Year and Semester: 2012, Session 2

Unit convenor: Dr Parmod Chand

Prerequisites/Corequisites: N/A

Credit points: 4

Students in this unit should read this unit outline carefully at the start of the session. It contains important information about the unit. If anything in it is unclear, please consult one of the teaching staff in the unit.

ABOUT THIS UNIT

- This unit is concerned with issues in both financial and management accounting in international contexts. Particular attention is given to the impact of national culture and to how an understanding of cultural differences provides insights into cross-national differences in accounting behavior and practice. Students are also taught the fundamental principles of ethical behavior in accounting, and the different approaches used to 'manipulate' accounting numbers. Current issues in accounting standard-setting in an international context, including the debate on international harmonisation, are also examined. With respect to management accounting, the unit examines issues and problems facing international companies in organizing, managing, planning, controlling and evaluating their global operations.

- Given the continued globalisation of business and integration of capital markets, it is critically important that students understand the differences in accounting behaviour, principles and practices which underlie the accounting function within, and between, organisations across countries. The unit is a fundamental element in the Master of Commerce/Master of International Business degree, which is characterised by a diverse student cohort from a broad variety of cultural and geographic backgrounds.

CONTACTING STAFF

- Consultation times
  Staff will be available for consultation; these times will be posted to unit homepage by Week 1 of the session. You are encouraged to seek help at a time that is convenient to you from staff on this unit during their specified consultation hours. In special circumstances, an appointment may be made outside regular consultation hours. Staff will not conduct any consultations by e-mail. You may, however, phone staff during their consultation hours.

In order to gain access to staff located at levels 1 and 2 of building E4A during their consultation hours please ring the staff member from the phones available in the lobby (phone numbers of relevant staff members will be provided on iLearn and are available next to the phones).

- Other ways of contacting staff
  The most effective way for students to contact staff is via email.

Students experiencing significant difficulties with any topic in the unit are strongly encouraged to seek assistance immediately.

CLASSES

- There are 3 hours of contact for learning per week consisting of 1 x 3 hour seminar (lecture and tutorial).
- There are three classes in Session 2/2012.
  - Class_01 Thursday 3pm-6pm in C4A 315
  - Class_02 Friday 9am-12pm in E5A 170
  - Class_03 Friday 6pm-9pm in C5A 304

- In order to avoid confusion and issues with overcrowding, which can raise serious occupational health and safety issues, students must attend their registered class each week to be recorded as present. Students will not be allowed to attend or be recorded as attending other classes in the unit.
- The timetable for classes can be found on the University web site at: http://www.timetables.mq.edu.au/

REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS

This text is a composite book made of selected chapters from four different texts published by Pearson Education Australia. By using a composite text we can focus only on chapters that are suited to this unit, which is cost-effective to the student.
TECHNOLOGY USED AND REQUIRED

You will need basic skills with Microsoft Word, Microsoft Excel and Microsoft PowerPoint. The research report e-copy can be submitted in Word or PDF.

You will also be required to access the Internet in order to conduct research and Macquarie University’s iLearn teaching facility (refer to the detail contained below in Unit Web Page).

UNIT WEB PAGE

The university’s on-line learning site “iLearn” is used to provide announcements, forms, some course materials (including weekly lecture notes) and to submit e-copies of the assignment. Login at http://learn.mq.edu.au/

Reading material for this unit is all available on the Library’s e-Reserve. Access to the e-Reserve is made using the student number and password supplied to you by the Library. A link will also be provided on iLearn.

LEARNING OUTCOMES

The learning outcomes of this unit will help students:

1. Understand some of the differences in accounting methods and disclosure practices we might find when we compare the financial reports of companies from different countries.
2. Appreciate how accounting and corporate disclosure is regulated in a range of different nations, and the role that the accounting profession, government and other bodies have in that regulation.
3. Recognise the cultural, economic, political and historical factors that help explain differences and similarities in patterns of accounting and regulation across nations, and how these factors may influence the move towards international harmonization.
4. Identify why ethical behaviour is fundamental to the practice of accounting and how accounting numbers can be manipulated.
5. Comprehend the issues and problems facing international companies in organizing, managing, planning, controlling and evaluating, their global operations.
6. Develop and strengthen their generic skills in the areas of report writing and topic discussion.
GRADUATE CAPABILITIES

In addition to the discipline-based learning objectives, all academic programs at Macquarie seek to develop the capabilities the University's graduates will need to develop to address the challenges, and to be effective, engaged participants in their world. This unit contributes to this by developing the following graduate capabilities:

<table>
<thead>

LEARNING AND TEACHING ACTIVITIES

- Students are expected to read all the materials for a particular session in advance of the class. All the material that does not come from the textbook (to which all students should have their own access) or via iLearn/e-reserve, will be provided by the lecturer.
- It is advisable that students make notes summarizing the reading material. These notes do not need to be submitted for assessment; however they will allow discussion of the questions and material in class. Specific tasks are given for some topics and the solutions are provided in class.
- An extensive use is made of group assignment preparation and a special feature is the presentation of reports to the class by groups during week’s nine to twelve.

RESEARCH AND PRACTICE

- The unit contains a group research-based written assignment worth 25% of the overall assessment.
- The unit incorporates recent academic research throughout the teaching materials in order to ensure students are informed of the latest developments in the subject area.

RELATIONSHIP BETWEEN ASSESSMENT AND LEARNING OUTCOMES

The learning outcomes are assessed as follows:
- In-class test (Weeks 4 and 7) 15%
- Group Research Report (Weeks 9-12) 25%
- Final Examination 60%
- 100%

The following summary table indicates the alignment between the assessment tasks and learning outcomes.
Assessment Tasks | Value | Learning Outcomes
---|---|---
1. In-class tests | 15% | ✓ ✓ ✓ ✓ ✓ ✓
2. Group Research Report | 25% | ✓ ✓ ✓ ✓ ✓
3. Final Examination | 60% | ✓ ✓ ✓ ✓ ✓ ✓

In order to receive a Pass grade or better in this unit, it is necessary to pass (obtain at least 50% in) the final exam as well as pass the overall assessment.

The assessment components are explained in more detail below:

**IN-CLASS TEST (15% of overall assessment)**
During Week 4 (covering Weeks 1-3) and Week 7 (covering Weeks 4-6) short tests will be conducted during class time. Each test will account for 7.5% of your overall assessment. The first test in Week 4 is an early diagnostic assessment, the results of which will be indicative of the student’s application to achieving the learning outcomes of the unit. Students who achieve poor results in this test should consult the teaching staff regarding strategies for improving their performance. The tests are designed to give timely feedback as to your understanding of key topics and concepts of topics covered and to identify any particular learning challenges or areas of difficulty prior to the final examination. You must sit for each test in your registered class. The attendance roll will be marked just before each test and students not registered in that class will not be allowed to sit the test.

Each test will consist of multiple choice questions and be of 30 minutes’ duration. The test will be closed-book (no reading materials or course notes can be consulted during the test) and conducted under examination conditions. The tests will not be returned to students but the solutions will be discussed in class.

If the test is missed due to illness or other valid reason students can apply for Special Consideration. There is no supplementary test but the marks awardable to the test may be re-distributed to the final exam.

**GROUP RESEARCH REPORT (25% of overall assessment)**
Submitted during Weeks 9-12

Students will work in groups of four to five people for this assignment. Each group presents a different topic (there are 12 topics). The topics are located in the class schedule for weeks 9-12. Students will form themselves into groups between weeks 4 and 5 and submit an allocation form in class during Week 5. Preferences for topics are also made on that form. Do not commence work until your topic is confirmed by the lecturer via iLearn.

The Report topics are designed to extend the themes and subjects of the lecture material, by means of additional information and examples discovered by the students. This represents an interactive method of learning that draws on lecturer leadership, student research and class discussion. Each group must:
1. Prior to a presentation, prepare a written Report of no more than 2500 words in length. PLEASE DO NOT EXCEED THE WORD LIMIT. A PENALTY MAY APPLY IF THE WORD LIMIT IS EXCEEDED (this requirement is to help establish fair assessments). The word length includes headings but does not include the reference list at the end or appendices. Please keep appendices to a minimum.

USE THE COVER SHEET PROVIDED ON iLEARN.

2. Prepare a power point presentation or overhead projector slide summary of no more than ten slides of their findings in the Report. (A paper copy should also be brought as a back-up). The slide summary will be used to present the Report to the class. PLEASE DO NOT EXCEED THE SLIDE LIMIT. A PENALTY MAY APPLY IF THE SLIDE LIMIT IS EXCEEDED.

3. An e-copy of the written assignment must be submitted via iLEARN before the presentation. One paper copy must be provided to the lecturer in class immediately before the presentation. An INSTANT TEN MARK PENALTY applies unless both copies are supplied on time. Note: Emailed copies are not acceptable. The lecturer will scan the e-copy with the university’s anti-plagiarism software.

4. Nominate one or more members to make the presentation, on behalf of the group, to the rest of the class. After this, the topic will be opened for further discussion, with the class being invited to ask questions of the group. Presentations are restricted to 20 minutes per group.

The group will be given a combined mark out of 25 for the presentation and the written report. Marks will be distributed as follows: Presentation component, maximum 10 marks; Written component, maximum 15 marks. When awarding marks the lecturer will assess the professional nature of both components. For the presentation component, the group’s ability to stimulate interest and class discussion will form part of the assessment. The marks are part of the formal evaluation in the unit. Each group member will receive the same mark unless the group indicates otherwise. It is the students’ responsibility to make sure that workloads are distributed properly. The marked projects will be returned to the students with feedback in the week following the presentation and the criteria for marking will be provided on iLearn.

To conduct your research, you may find it helpful to consult the internet, regulators’ sites in particular, also newspapers, business magazines and professional or academic journals. Write your reports in a professional manner with sub-headings and clearly defined sections. Be succinct and clear. Don’t waste any words. Don’t copy lengthy quotes. Reports must be neatly presented, double spaced, typed on ONE side of the page only. Please keep a copy of your assignment.

Please be aware of PENALTIES for PLAGIARISM (see below in this unit outline)
Appropriate referencing
You should acknowledge all sources of material in an accepted academic manner. Each statement, quote, piece of information that is not your own must be identified throughout the Report and a reference given which shows full details of author, publication, date, page number. IT IS NOT SUFFICIENT JUST TO HAVE A LIST OF REFERENCES AT THE END.

Any passage that is directly reproduced needs QUOTE MARKS (“…””) plus a reference, example, the following is word-for-word copy from Brown:

“Mitsubishi corporation approached the New York Stock Exchange during January 1996 and obtained a favorable outcome from the chairman on seventeen of their twenty-five demands” (Brown 2007, page 1).

You will also need to put full details of Brown in your alphabetic reference list at the END of the assignment. If an internet reference has no page number you can cite the URL.

Aardvaark, A., 2004, ………………………………………………………………………

Brown, B., 2007, title of article or chapter, name of publication underlined, edition number, page numbers.

If you are abstracting the idea from its source and re-writing in your own words you do not need the quotation marks, for example:

If you need more information on how to reference properly then go to the Macquarie University Library website at http://www.lib.mq.edu.au/research/referencing.html

It is recommend you use the Harvard Referencing system. In ACCG835 I do not mind if the style of the referencing varies a little as long as it is understandable and accurate.

Appropriate referencing is essential for your research report. Students who provide inadequate or no references can expect to receive penalties even if there is no evidence of plagiarism. A written submission with no references at all but without evidence of plagiarism can usually expect to receive a penalty of 50% of awardable marks. Those with inadequate references can expect to receive a penalty in the range of 10-50% of marks.
Copying from the internet
While the internet provides a useful material source we have had a number of problems in the past with the way students use the material in their assignments. Turnitin ® software is able to give lecturers a precise indication of the amount of internet material used in the assignment (i.e. as a percentage of the assignment). (Note: Commonly used phrases, titles, etc identified in Turnitin are not regarded as plagiarism and the lecturer uses discretion on these.)

Some students copy and paste large slabs of material directly from the internet into their assignments without any change or attempt to rewrite the material in their own words. Small amounts of referenced quotations are acceptable but these should be reserved for making some significant point. What constitutes a “large amount” of copying might depend on the assignment question but when more than about 10% of the whole assignment consists of word-for-word copied passage(s) then:

1. If you have not used appropriate references then you have PLAGIARISED from the internet and can expect to be penalized. In cases where the copying looks to stem from lack of familiarity with report writing the lecturer will impose partial penalties: assignments which have x% unacknowledged internet passages will receive a reduction of x% of the awardable marks. HOWEVER: if an assignment contains blatant, deliberate plagiarism the students involved may receive zero marks for the assignment and be reported to the university’s disciplinary committee.

2. Even if you do use appropriate references, the material is still not really your own, you didn’t write it, copying and pasting isn’t very difficult, you haven’t really demonstrated that you have done much work, and you can’t expect to get very many marks for such an assignment. Assignments that have more than about 10% of copied material will receive the same pro-rata reduction in awardable marks as above.

FINAL EXAM (60% of overall assessment)

A 3 hour final examination for this unit will be held during the University Examination period. The University Examination period in Second Half Year 2012 is from Monday 12 November 2012 to Friday 30 November 2012. Details on the final exam will be provided to students towards the end of the session. ACCG835 students must be available to sit the exam during the exam period. Please do not make arrangements to leave Sydney before you know the exam date. Examinations cannot be given early to individual students. A final examination is included as an assessment task for this unit to provide assurance that:

   i) the product belongs to the student and
   ii) the student has attained the knowledge and skills tested in the exam.

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations. [http://www.timetables.mq.edu.au/exam](http://www.timetables.mq.edu.au/exam)
The only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to consider applying for Special Consideration. The University’s policy on special consideration process is available at http://www.mq.edu.au/policy/docs/special_consideration/policy.html

If a Supplementary Examination is granted as a result of the Special Consideration process the examination will be scheduled after the conclusion of the official examination period.

The Macquarie university examination policy details the principles and conduct of examinations at the University. The policy is available at: http://www.mq.edu.au/policy/docs/examination/policy.htm

Student workload on tasks

An estimate of the time spent by students on unit tasks is as follows:

<table>
<thead>
<tr>
<th>Tasks</th>
<th>Hours</th>

<td>96</td>
</tr>
<tr>
<td>2. Face-to-face teaching</td>
<td>39</td>
</tr>
<tr>
<td>3. Group Research Report</td>
<td>20</td>
</tr>
<tr>
<td>4. Final Examination preparation</td>
<td>25</td>
</tr>
<tr>
<td>Total</td>
<td>180</td>
</tr>
</tbody>
</table>

**Academic Honesty**

The nature of scholarly endeavour, dependent as it is on the work of others, binds all members of the University community to abide by the principles of academic honesty. Its fundamental principle is that all staff and students act with integrity in the creation, development, application and use of ideas and information. This means that:

- all academic work claimed as original is the work of the author making the claim
- all academic collaborations are acknowledged
- academic work is not falsified in any way
- when the ideas of others are used, these ideas are acknowledged appropriately.

Further information on the academic honesty can be found in the Macquarie University Academic Honesty Policy at http://www.mq.edu.au/policy/docs/academic_honesty/policy.html
## Grades

Macquarie University uses the following grades in coursework units of study:

- **HD** – High Distinction
- **D** – Distinction
- **CR** – Credit
- **P** – Pass
- **F** – Fail

Grade descriptors and other information concerning grading are contained in the Macquarie University Grading Policy which is available at: [http://www.mq.edu.au/policy/docs/grading/policy.html](http://www.mq.edu.au/policy/docs/grading/policy.html)

All final grades in the Department of Accounting and Corporate Governance are determined by a grading committee and are not the sole responsibility of the Unit Coordinator.

Students will be awarded one of these grades plus a Standardised Numerical Grade (SNG). The SNG is not necessarily a summation of the individual assessment components.

The final grade and SNG that are awarded reflect the corresponding grade descriptor in the Grading Policy.

**In addition, there is a requirement to pass the final examination to be awarded a final grade of a Pass or a higher grade.**

### Grading Appeals and Final Examination Script Viewing

If, at the conclusion of the unit, you have performed below expectations, and are considering lodging an appeal of grade and/or viewing your final exam script please refer to the following website which provides information about these processes and the cut off dates in the first instance. Please read the instructions provided concerning what constitutes a valid grounds for appeal before appealing your grade.

### Special Consideration

The University is committed to equity and fairness in all aspects of its learning and teaching. In stating this commitment, the University recognises that there may be circumstances where a student is prevented by unavoidable disruption from performing in accordance with their ability. The only exception to not sitting an examination or in-class test at the designated time is because of documented illness or unavoidable disruption. Students who do not sit for the final examination may wish to consider applying for Special Consideration. A special consideration policy exists
to support students who experience serious and unavoidable disruption such that they do not reach their usual demonstrated performance level. The policy is available at: [http://www.mq.edu.au/policy/docs/special_consideration/policy.html](http://www.mq.edu.au/policy/docs/special_consideration/policy.html)

**Unit policy regarding illness and supplementary exams**

1. Special consideration/supplementary exams are not automatically granted: they depend on the nature of any illness or other circumstances. They may not be granted when coursework results are unsatisfactory.

2. If you are unwell during the exam, report this to the exam supervisor. You will be taken to the medical centre for an assessment by the doctor. Depending on the assessment you may qualify for special consideration or a supplementary exam.

3. If you:
   
   (a) attend the exam, and
   (b) you do not report that you were unwell to the exam supervisor as required in (2) above,

   then do **NOT** apply for a supplementary exam later. You will **NOT** be granted an application for a supplementary exam under such circumstances.

**What is satisfactory coursework?**

To have satisfactory coursework in this unit you must have passed (obtained 50% or more) in the aggregate marks of your in-class tests and research report AND have attended at least nine weeks of class.

**STUDENT SUPPORT SERVICES**

Macquarie University provides a range of Academic Student Support Services. Details of these services can be accessed at [http://www.student.mq.edu.au](http://www.student.mq.edu.au).

**IT CONDITIONS OF USE**

Access to all student computing facilities within the Faculty of Business and Economics is restricted to authorised coursework for approved units. At all times, student ID cards must be displayed in the locations provided. Students are expected to act responsibly at all times when utilising University IT facilities. The following regulations apply to the use of computer labs and online services:

- Accessing inappropriate web sites, or downloading inappropriate material, are not permitted, material that is not related to coursework in units authorised to use these facilities is deemed inappropriate.
• Downloading copyright material without permission from the copyright owner is illegal, and strictly prohibited. Students detected undertaking such activities will face disciplinary action, which may possibly result in criminal proceedings.
• Non-compliance with these conditions may result in disciplinary action without further notice.

Students are reminded to communicate to staff only through their specified Macquarie University email account as this is the only official channel.

WEEK 1

Introduction, distribution of unit material and group formation

The lecturers will introduce the course, distribute material and hold a discussion about the unit outline and the assessment. The main remaining activity will be to discuss the group assignment and talk about the formation of student work groups for the purposes of the assignment and presentation (Weeks 9-12). Students will collaborate within each group to produce the assignment.

The group assignment (Weeks 9-12) is part of the method of continuous assessment used in this unit (worth 25% of overall assessment). For this assignment groups will have a strict maximum of five students. It is anticipated that most groups will have four or five members, though a group with three members is also acceptable. A group with less than three members will require special permission of the lecturer and there would need to be a good reason. The allocation of topics for this assignment requires a formal notification of group membership and request for topic preferences, which will be done in week 5.

The advantages of group assignments are many. Group work gives the student an opportunity to meet others in both a study and social context, it allows for diversification of ideas and division of labour, it allows for problems to be discussed and resolved, and it provides students with a safety net of their own colleagues.

Towards the end of class there will be an opportunity for students to meet each other and talk among themselves about possible group membership. The actual formation of the groups is done by students themselves.

In many cases group members will be from the same country but this will not always be the case. In the past, we have usually had a number of Chinese groups, and some others that have had several countries represented in the same group, for example, Sweden, Norway, Germany.
WEEK 2

The concept of culture and its relevance to international accounting diversity

Reading

- Textbook, Roberts chapter 7.

Lecture guide:
The lecturer will present a discussion that includes the following major topics:

- Introduction to the works of Geert Hofstede, social theorist.
- National culture differences.
- Hofstede’s dimensions: individualism-collectivism, power distance, uncertainty avoidance, masculinity-femininity, and long-term/short-term orientation.
- Independent and interdependent construal of self.
- Relevance of cultural theories for international accounting studies.
- Culture and accounting values.

Requirements for students
Students are required to read the set material as outlined above before coming to class and be prepared to answer questions and participate in class discussions related to the topic being covered. The lecturer encourages students to participate in discussion of any of the topics during the presentation.

Prior to the class students are required to prepare answers to the following questions and be prepared to discuss their answers in class.

1. How does Hofstede define and describe culture? Is his concept of culture consistent with the way you think of culture?

2. Discuss at least two limitations of using Hofstede’s five dimensional culture model in international accounting research.
WEEK 3

Ethical Behavior in Accounting

Reading:

- Textbook, Stanwick chapter 9.

Lecture guide
The lecturer will present a discussion on the fundamental principles underlying ethical behaviour in accounting and methods of creative accounting.

Requirements for students
Read the set material before coming to class. The lecturer encourages students to participate in discussion of any of the topics during the presentation.

Questions to guide your reading and for class discussion:

1. Why do you think it is important that there should be a formal code of conduct guiding accounting behaviour?

2. In terms of interpreting accounting and auditing standards, what is the meaning of the term “substance-over form” approach?

3. Why is it important to understand cultural influences on judgments of professional accountants?

4. Is creative accounting illegal, and why is it difficult to restrict creative accounting?
WEEK 4
Management planning and control

Reading
• Textbook, Choi chapters 10 and 12.

Lecture guide
The lecturer will present a discussion on performance evaluation topics and transfer pricing.

Requirements for students
Students are required to read the set material as outlined above before coming to class and be prepared to answer questions and participate in class discussions related to the topic being covered. The lecturer encourages students to participate in discussion of any of the topics during the presentation.

Students are required to prepare answers to the following end of chapter exercises and be prepared to discuss these in class.

• Chapter 10 Exercise 8; and
• Chapter 12 Exercises 6 and 8.

IN CLASS TEST
The in-class test will be held during class time this week. For details see the assessments section in this unit outline.
Presentation of group Research Reports during Weeks 9 to 12

Students to allocate themselves into groups by submitting form next week (Week 5).

Finalise group formation with classmates now.

Each student group must present a Research Report based on one of the topics that are scheduled, sometime during weeks 9 to 12. See the assignment instructions earlier in this outline. Students are asked to form themselves into groups of strict maximum FIVE STUDENTS by submitting a form to the lecturer during Week 5 (one form per group). The form should be downloaded from iLearn. Students are encouraged to form a group from diverse countries so that they can learn in a cross-cultural way and have new experiences.

The form will also record the preferences of the group for one of the Report topics. Each topic can only have a Report made by one group. The lecturer will allocate the topics and students will be notified of the allocation the same week when they are posted on iLearn. It is envisaged (though cannot be guaranteed) that each group will receive one of their four preferences. Not all groups will receive their first preference. Once allocated, change of topics is not permitted. A group must present the report on the scheduled day or forfeit the marks. Students are advised not to commence work on the Report until they are certain of their topic allocation.

Students should complete discussion about formation of the groups this week. Have your forms ready for collection in Week 5 classes.
WEEK 5

Management control in an international context: Performance Evaluation
Case study – Del Norte Paper Company (C)

Reading
• Textbook, Choi chapter 10.
• Case Study: Del Norte Paper Company (C).

Requirements for students
The case study will occupy the whole class time. Students should read the Del Norte case study (C), prepare answers to question 2 below and be prepared to discuss these in class. We will interactively discuss the issues, and optimal solutions will be decided.

Questions for Del Norte case study (C):

1. In general terms, how does the capital budgeting system work? What are its component parts and events? When do the events take place and how are they linked?

2. The Italian and German managers refer to several problems or concerns with the capital budgeting system with respect to how it affects their performance and performance evaluation. What are their concerns about the following:
   (i) the time lag in the system (generally expressed by all managers);
   (ii) the measurement of labour savings (see Rizzo’s and Corleone’s separate statements on page 6);
   (iii) the apparent arbitrariness and cyclicalty of decisions (approvals or rejections) by San Francisco (see Rizzo’s comment on page 7 about cyclicalty and Lowenstein’s comment at bottom of page 8);
   (iv) the self-financed nature of the subsidiaries;
   (v) exchange rate movements (see Buskey’s comment on page 9); and
   (vi) the spending authority limits?

3. What strengths does the current system possess?

4. What recommendations for change to the capital budgeting system and/or to the performance evaluation system would you make to management?

Students are also required to be prepared to discuss their answers in class.

Collection of forms for allocation of new groups and topics for Research Report presentations during weeks 9 to 12.
WEEK 6

Management control in an international context: Transfer pricing
Case study – DelNorte Paper Company (A).

Reading
• Textbook, Choi chapter 12.
• Case Study: Del Norte Paper Company (A).

Requirements for students
The case study will occupy the whole class time. Students should read the Del Norte case study (A), and prepare answers to questions 1 and 2 below and be prepared to discuss these in class. We will interactively discuss the issues, and optimal solutions will be decided.

Questions for Del Norte case study (A):

1. Calculate the contribution per ton of boxes that DNP-Italia earned on the African box sale. How much contribution would DNP-Deutschland have earned had they been awarded the bid at $1,200 per ton and purchased their linerboard requirements from the U.S.? How much contribution would DNP Consolidated (the total company) have earned if DNP-Deutschland had been awarded the bid at $1,200 per ton?

2. Based on a comparison of the contributions in the first question, what is the nature of the problem faced by Del Norte management in the U.S. headquarters?

3. How does Del Norte solve this problem in the domestic (U.S.) market? Evaluate the pros and cons of this solution.

4. Is a similar solution feasible at the international level? If not, why not? What characteristics does the problem possess at the international level that distinguish it from the domestic level? What are the solution options open to Del Norte in dealing with the problem at the international level and what are the potential consequences of each option?

Students are also required to be prepared to discuss their answers to all questions in class.
WEEK 7

External Reporting in an International Context: Differences and similarities

Reading
• Textbook, Choi chapter 2 and Nobes chapter 2.

Lecture guide
In this week we will briefly consider why we observe so many similarities in accounting practices. We will then turn our attention to the differences. We will look at some examples of how different accounting methods can be used to record the same underlying economic transaction. We will also observe the impact these different accounting methods have on the profit and loss statement and balance sheet, and describe their impact in terms of the Gray accounting values discussed in the textbook.

Requirements for students
Please complete the following questions from the readings above for discussion in class.

1. Are national differences in accounting practices better explained by culture or by economic and legal factors? Why? (source Choi chapter 2)

2. What is the difference between a judgemental and an empirical classification of accounting? (source Choi chapter 2)

3. Why is it difficult to establish a causal relationship between specific external factors and international differences in accounting? Discuss the methodological problems in identifying possible causes. (source Nobes chapter 2)

4. Are the international differences in the formats of financial statements a major obstacle to comparing the statements? (source Nobes chapter 2)

IN CLASS TEST
The in-class test will be held during class time this week. For details see the assessments section in this unit outline.
WEEK 8

External reporting in an international context: Preparing and adjusting financial statements for international accounting standards: Noresia Limited case study

Reading
- Textbook, Nobes chapter 6.
- Noresia Ltd Case Study.

Requirements for students
The case study will occupy the whole class time. This week’s tasks involve analysis of accounting standards, computation with numerical data, double entry bookkeeping and preparation of accounts including profit and loss and balance sheet. These tasks have several purposes:

1. Students can re-familiarize themselves with accounting principles and the mechanics of financial statements. This is a vital prerequisite to the understanding of comparative international financial accounting.

2. Noresia is an introduction to the nature of International Accounting Standards, which are becoming increasingly important in world accounting.

Complete Part A of the case study prior to class. We will discuss Part A in the first section of the class, and then Part B will be completed interactively in the remainder of the class. Note that a question similar to some of the Noresia material will appear in the exam.
WEEK 9

Corporate reporting regulation: Understanding differences — USA.

Reading
• Textbook, Choi chapter 4.

Lecture guide
The purpose of weeks 9, 10 and 11 is to consider the main features of corporate reporting regulation, and accounting and disclosure practices, in a number of different countries. The lecturer will begin the class with a demonstration of how the Gray model can predict what kind of accounting we would expect to find in the USA, based on that country’s cultural indices developed by Hofstede. Following this, will be a discussion on the reality of US economy, business history, institutions, politics and accounting. We will use the same approach for the other country studies.

Requirements for students
Please complete the following questions from the readings above. This will help prepare you to discuss issues in class:

Case 4-1 Standing on Principles – questions 1-4 of the case (page 249 of textbook)

Research Report topics for presentation during Week 9 (USA):

Topic 1
Obtain information about some recent corporate collapses in the U.S. (other than Enron and Worldcom). To what extent is it suggested that these collapses were the result of defective accounting practices? What were the other causes?

Topic 2
There is a school of thought suggesting that accounting standards played a significant role in causing or exacerbating the global financial crisis of 2008-9.

Evaluate this proposition with relevant evidence to support or reject it.

Topic 3
Describe and give examples of powerful interest groups who influence the U.S. SEC and the FASB. (Concentrate on the interest groups more than the SEC/FASB.) Which interest group has the most influence do you think? What effect does this influence have on the outcome of standard-setting? Give examples.
WEEK 10

Corporate reporting regulation: Understanding differences — Japan and China.

Reading
- Textbook, Choi chapter 4.

Lecture guide
The lecturer will begin the class with a discussion on Japanese accounting, using the same theory v reality method introduced for the USA class. The lecturer will then outline the main features of Chinese corporate governance. The lecturer is hoping that, given the large number of students from that country, the Research Reports will provide some thorough analyses of the prevailing situation there!

Requirements for students
Please complete the following questions from the readings above for discussion in class.

1. Case 4-2 Casino Capital – questions 1-4 of the case (Textbook, p. 250)

Research Report topics for presentation during Week 10 (Japan and China)

Topic 4
Obtain information on one Japanese Zaibatsu that has survived to be a Keiretsu in 2011. Trace its corporate history especially in terms of the Japanese preoccupation with secrecy and conservatism. Are these factors still evident in the company’s reports? To what extent has the company been able to resist recent pressures to provide more open information and accounts at “fair value”?

Topic 5
Bloom and Solotko (2003) summarize the Confucian origins of Chinese and Japanese business and accounting. They conclude that "Neither Chinese nor Japanese accounting systems can be considered strict adherents to Confucianism in view of the significant role of the government in both systems. What can be said about these systems is that they owe their roots in large part to Confucianism." (p.37). Compare Japan and China. In view of recent events (i.e. post-2005) in accounting regulation and corporate governance, which country, if either, is drifting further from its Confucian origins?

Topic 6
How closely do the new Chinese accounting standards resemble IFRS? What problems or issues experienced by the Chinese authorities have given rise to differences between Chinese GAAP and IFRS?
WEEK 11

Corporate reporting regulation: Understanding differences — France, Germany, Netherlands

Reading
- Textbook, Choi chapter 3.

Lecture guide
The lecturer will begin the class with a discussion on France, Germany, Netherlands. The Research Report presentations will occupy the second part of the class.

Requirements for students
Please complete the following questions from the readings above for discussion in class.

Research Report topics for presentation during Week 11 (France, Germany, Netherlands)

Topic 7
Evaluate the role the European Union (being a supranational body), is playing in the international accounting convergence process, with respect to the formal procedures and institutions it has in place, and the role they play. How effective do you think the EU is speaking with one voice in accounting, given that it represents 27 different member states with unique cultural, social and economic systems.

Topic 8
Present the corporate history of one major German or Dutch listed company that has existed since the year 1900. Show how changes in the appearance of the company’s financial reports reflect changes in economic, social and political demands and developments during one hundred years. Your report should also include a comparison of the company’s financial position and performance based on German or Dutch accounting standards and IFRS.

Topic 9
Trace the influence of French accounting to a French colonial (or former colonial) country. To what extent has that country moved away from French accounting and why?
WEEK 12
International Convergence of Accounting:
Historical background, benefits and problems, global players, recent developments

Readings
• Textbook, Nobes chapter 4.

Lecture guide
We will consider the benefits, problems and issues associated with international accounting harmonization and convergence. Our discussion will be focused around the International Accounting Standards Board (IASB) and the many different groups that have an interest in its International Accounting Standards (IAS) and Financial Reporting Standards (IFRS). We will examine the politics associated with developing, implementing and evaluating IAS and IFRS. The objective here will be to gain an understanding of the pressures and events that have led to the contemporary role and status of the IASB.

In the second half of the seminar we will use at least two accounting models to evaluate the usefulness of IFRS in specific country contexts. We will refer to historical, political, economic, cultural and legal influences to show the importance of contextual factors in international accounting. Finally, we critically challenge the assumption of superiority and universal applicability of IFRS

Requirements for students
All students should also do the required reading before class and be prepared to answer questions and participate in class discussions related to the topic being covered. Class discussion topic:

Some researchers have claimed that International Accounting Standards Board is more involved in politics associated with standard setting rather than focusing on developing relevant and reliable standards. Discuss whether you agree or disagree with this statement.

Research Report topics for presentation during Week 12

Topic 10
To what extent do you think the US/IASB harmonization programme is really a continuation of US attempts to have IFRS re-created in the likeness of US GAAP? Supply evidence that focuses on events as recently as possible.

Topic 11
Discuss recent harmonization problems in a South American country.

Topic 12
Discuss recent harmonization problems in an Asian country (not China or Japan).
