ACCG861 PRINCIPLES OF ACCOUNTING

UNIT OUTLINE-TRIMESTER 1 2008

Unit Description

Accounting is an information system designed to enable the preparation of financial statements that will provide relevant information for the making of economic decisions. This course will focus on accounting information systems for non-incorporated businesses. When you have completed the course, you should understand accounting fundamentals including:

- Who are the users of accounting information;
- Some basic assumptions and principles underlying accounting;
- The meaning of the terms asset, liability, owner's equity, revenue and expense;
- The accounting systems for unincorporated single and multiple owner businesses.

This course provides the necessary theoretical concepts to understand accounting fundamentals, but is principally concerned with accounting practice. To enable you to understand and apply both the fundamentals and practices of accounting, selected questions and problems will be assigned each week. Students are required to complete these problems prior to their class in the next week at which time there will be an opportunity to resolve any problems experienced with material. Solutions to the questions will be made available through Online Learning @ MQ.

A pass is required in ACCG861 before commencing ACCG862.

Generic Skills

Throughout the Postgraduate Diploma/Master of Accounting program generic skills that are required within a professional accounting environment are developed. These skills include writing, reading, comprehension, problem solving, team building and communication. Students' participation within seminars, homework material and assessment tasks are designed to enhance these skills. A class presentation by the Careers Development Office and the related assignment will highlight particular generic skills that will be developed more fully in later units within the program.

The dangers of cheating and plagiarism and how to avoid them

To cheat in the context of university assignments, tests and examinations is to attempt to gain an unfair advantage by violating the principles of intellectual and scholarly integrity. Cheating also encompasses plagiarism, which is the appropriation or imitation of another person's ideas and manner of expressing them. Both cheating and plagiarism carry heavy penalties. For more details on this issue refer to the section of the 2008 Handbook of Postgraduate Studies, or to the section of the Division of Economic and Financial Studies website dealing with this issue, at <http://www.efs.mq.edu.au/cheating.html>.
