

**Division of  
Economic and Financial Studies  
Department of Economics**

**ECON141 – Introductory Econometrics**

**Course Outline**  
Day and Evening

**2004**

**Second Semester**

**MACQUARIE UNIVERSITY**  
**DIVISION OF ECONOMIC AND FINANCIAL STUDIES**

**ECON141 - INTRODUCTORY ECONOMETRICS**  
**Second Semester 2004**

**UNIT OUTLINE**

**1. Overview of ECON141**

The aim of ECON141 is to acquaint students with econometric techniques frequently used in the analysis of economic, financial and marketing data. A basic level of competence in using these techniques, together with an appreciation of their strengths and limitations, is essential for economists, financial analysts and market researchers.

The unit builds on statistical techniques covered in STAT170 (Introductory Statistics) with emphasis given to applications in economics, finance and marketing. Mathematical proofs and derivations are considered only to the extent necessary to facilitate an understanding of key concepts and the interpretation of results.

During the semester students will be required to use the computer program Microsoft EXCEL. The use of this computer program is an integral component of tutorial exercises and the assignment. Instruction in the use of the computer program will be given in lectures, tutorials and practicals as required. The computing component of the unit is not examinable in the mid-semester tests or end-of-semester examinations.

**2. Prerequisites**

ECON141 has two prerequisites. Students must have obtained at least a Pass in

- (i) STAT170 or STAT171; and
- (ii) ECON110 or ECON111.

**3. Text**

The prescribed text for the unit is:

D. Gujarati  
*Essentials of Econometrics*  
Second edition, McGraw Hill, 1998

Students for whom ECON141 is a terminating unit in econometric and statistical techniques, or who require a basic, introductory, non-technical discussion of the material covered in ECON141 can purchase the following book additionally:

Harrison, S.R., and R.H.V. Tamaschke  
*Statistics for business, economics and management*  
Prentice Hall, 1993

The text and lecture notes, together with the lectures and additional references, will provide students with a clear indication of the basic content of the unit.

### **Lecture Slides**

Copies of the Lecture Slides used in ECON141 can be purchased in the Union Bookshop. These notes also include additional applied topics. Because the lectures will use those slides, it is recommended that you bring the Lecture Notes to the lectures. It should be emphasised that additional transparencies will also be used in the lectures and thus it is imperative that you attend the lectures.

It is also recommended that you purchase the **2004 Second Semester Notes**. Lecture notes are different in the first semester. The lecture notes are also extensively edited every year.

### **4. Reference books**

There are a number of introductory books on Economic Statistics, Regression Analysis and Econometrics. Students may find the following book useful:

Bechtold, B., and R. Johnson  
*Statistics for business and economics*  
PWS-Kent, 1989

### **5. Class Arrangements**

Students are required to attend thirty six hours of lectures (i.e. three hours each week), seven one-hour tutorials and one one-hour computing practical. Non attendance at lectures, tutorials and practicals is the surest way to guarantee failure.

<b>Lectures:</b>	<b>Day Stream</b>	Monday 1 pm - 3 pm	Macquarie Theatre
		Thursday 4 pm - 5 pm	Macquarie Theatre
	<b>Evening Stream</b>		
		Monday 6 pm - 8 pm	C5C-T2
		Thursday 7 pm -8 pm	C5C-T1

#### **Tutorials/Computing Practicals:**

Tutorial Classes:	Weeks 3, 4, 7, 10, 11, 12 and 13.
Computing Practicals:	Week 5 (supervised)

The tutorial arrangements and topics covered in these tutorials are indicated on the Course Calendar at the end of this study guide.

Tutorial/Computing Practical groups, and Tutorial locations will be posted on the Notice Board outside the Economics Reference Room (C5C-244) and on the web. The location of the Computing Practicals will be advised in lectures.

### **6. Tutorial/Practical Exercises**

The Tutorial/Practical Exercises program commences in Week 2. Students are required to

attempt tutorial and/or computing exercises in weeks 2, 3, 4, 5, 6, 7, 8, 10, 11, 12 and 13. No tutorial or computing exercises has been set for Weeks 1 and 9.

Formal Tutorial classes and Computing practicals commence in week 3, and except for weeks 6, 8, and 9 continue till week 13. **There are no tutorial classes or computing practicals in weeks 1, 2, 6, 8, and 9.**

Students are expected to be able to complete the tutorial and computing exercises set for weeks 2, 6, and 8 without assistance from tutors. The solutions from these exercises will be available in the Economics Reference Room and on the web page. Students may discuss any issues or difficulties that they have arising from these exercises with staff during office consultation hours.

Students should attempt as many exercises as possible before the tutorial sessions so that they may more effectively benefit from the discussion. It is important that students be in a position when they attend tutorials to indicate which aspects of the exercises should be given priority.

Students are strongly advised to attend tutorials. The best advice that can be given to an ECON141 student is to attend lectures and tutorials, and to attempt the tutorial exercises before attending tutorials and before looking at the solutions.

#### 7. **Supplementary Exercises**

Additional Exercises have been set for weeks one through eleven. Answers will be available in the Economics Reference Room at the end of the same week. These exercises vary from being just drill exercises to more challenging exercises. They should help all students with additional practice.

#### 8. **Quizzes**

From week 3 you will be able to try out your econometric skills on our online quizzes. Refer to the Quizzes handout for additional information.

**Quizzes are compulsory in 2004: they count towards 5% of the course mark. There are 9 quizzes to complete, they are each of equal weight (each count towards (5/9)% of the course mark). Each one of them will be available for a period of four weeks from the time they can first be accessed.**

#### 9. **Assessment**

- (a) Two one-hour tests will be held
  - Day Stream** Thursday September 9 2004 (week 6) **and**  
Thursday October 28 2004 (week 11) from 4 to 5pm.
  - Evening Stream** Thursday September 9 2004 (week 6) **and**  
Thursday October 28 2004 (week 11)) from 7 to 8pm.
- (b) One assignment due on Wednesday October 13 2004 (week 9) by 5pm.
- (c) The online Quizzes.

- (d) A three hour end-of-semester examination.

The Mid-Semester examinations are worth 14% (7% each) of the final assessment. The Assignment is worth 7% of the final assessment. The quizzes are worth 5% of the final assessment. The Final exam is worth 74% of the final assessment.

- (a) The **MULTIPLE CHOICE TESTS** will be conducted in the normal lecture time on Thursday in weeks 6 and 11. Each test will be approximately 45 minutes duration, and attendance is compulsory. If you fail to attend these examinations you will be awarded a zero mark. There will be no catch-up or supplementary examinations. Students who experience serious misadventure and are unable to attend either test should submit a letter with appropriate documentary evidence to the Tutor in charge, Mr Michael Dobbie, C5C-374, X8502 as soon as possible.
- (b) The assignment will be marked and is worth 7%.
- (c) The **FINAL EXAMINATION** (3 hours) will consist of two components:
  - (i) Multiple choice questions (approximately 40%);
  - (ii) "Long" answers (approximately 60%).

To pass ECON141, students must satisfy four separate requirements:

- (1) Submit a satisfactory assignment;
- (2) Perform satisfactorily in the multiple choice tests;
- (3) Perform satisfactorily in the online quizzes;

**AND**

- (4) **PASS THE FINAL EXAM.**

**OF THE FOUR REQUIREMENTS, THE FINAL EXAM IS THE MOST IMPORTANT.**

**Even if your overall mark out of 100% is satisfactory, you will NOT pass the course if you do not pass the final exam.**

Under the current grading system, a standard numerical grade (SNG) will be awarded together with a band grade HD, D, Cr, P, PC or F.

**It is important for students to note that the SNG is NOT the weighted average of the raw marks for the above four assessment components.**

SNGs are not marks but are a ranking of students based on marks obtained from all facets of the unit assessment. The SNGs awarded in a particular unit are designed to indicate that the students in each performance band, from HD to PC, have satisfied the criteria for inclusion in that band and ranks them by their performance within that band.

Since the ranges of SNGs differ from band to band the relationship between raw marks and SNGs may differ from band to band even within the same unit.

The relationship between raw marks and SNGs would almost always differ between units.

## 10. Lecture Program

Topics	Reference in Gujarati	Reference in Harrison & T
<b>The Role of Econometrics in Economic Analysis</b>	<b>Chapter 1</b>	
<b>Basic Statistical Concepts: A Review</b>		
1. Random variables	2.3	2.1, 2.2, 2.4
2. Probability density function	2.5	
3. Rules of summation	2.1	3.1, 3.2
4. Mean of a random variable	2.7	
5. Variance of a random variable	2.7	4.1, 4.2, 4.3
6. Standard deviation of a random variable	2.7	
7. Populations and samples	2.8	5.2, 5.3, 5.4.4
8. Normal distribution	3.1	
9. t-distribution (using the t tables)	3.4	6.1, 6.2, 6.3
<b>Statistical Inference</b>		
1. Statistical Inference	4.5	7.3.1, 7.3.3
2. Estimation of Parameters: Point vs. Interval	4.5	7.4.1-7.4.3,
3. Hypothesis Testing	4.5	
4. Properties of Point Estimators	4.4	8.1-8.5
<b>The Two-Variable Regression Model</b>		
1. Purpose	5.1	9.2, 9.3, 9.4, 9.5, 9.7.1
2. Assumptions		
3. The error term	5.4	
4. Population and sample regression	5.5	
5. Least squares estimates	5.8	
6. Interpretation of the coefficients	5.8	
7. Elasticities		
8. Prediction	6.11	
<b>Properties of Least Squares Estimators</b>		
1. Mean and variance of the LS estimators	6.3	9.6.1
2. Gauss Markov Theorem	6.3	9.6.2
3. Probability distribution of the LS estimators	6.4	
<b>Inference in the Simple Linear Regression Model</b>		
1. Confidence intervals for the coefficients of the regression model	6.5	9.6.3 9.7.3
2. Hypothesis testing	6.5	
3. Prediction intervals	6.11	
<b>Analysis of Variance and Coefficient of Determination in the Two-Variable Model</b>		
1. Analysis of Variance	6.6	9.6.4
2. coefficient of determination	6.6	9.8
3. sample correlation coefficient	6.6	9.9
4. comparing correlation and regression analysis	6.6	
5. Reporting regression results.	6.7	

<b>Functional Forms of Regression Models</b> 1. Introduction to Functional Forms. 2. Log-Linear (log-log or double log) Models: Measuring Elasticity 3. Linear vs. Log-Linear Models		10.5
<b>The Multiple Regression Model</b> 1. Assumptions 2. Interpretation of the coefficients 3. LS estimation 4. Probability distribution of the LS estimators 5. Interval estimation <b>Hypothesis Testing in the Multiple Regression Model</b> 1. Student-t Tests 2. Goodness-of-Fit 3. F-Tests 4. ANOVA Table 5. Non linear functional forms: log-log and polynomials models 6. Prediction <b>Multicollinearity</b> 1. The nature of multicollinearity 2. Effects of multicollinearity 3. Identifying multicollinearity 4. Mitigating multicollinearity <b>Dummy Variables</b> 1. Intercept Dummy Variables 2. Slope Dummy Variables 3. Different Intercepts & Slopes 4. Testing for the existence of a qualitative effect. 5. Testing for a structural break 6. Seasonal Dummy variables	7.1, 7.2 7.2 7.3 7.3 7.7 7.6, 7.7 7.5 7.8 7.8 8.1, 8.2, 8.3, 8.7 10.1, 10.2 10.3, 10.4 10.5 10.8 9.1, 9.2 9.2 9.2 9.2 9.6 9.7	10.1, 10.2     10.3 10.5  10.6  10.4
<b>Heteroscedasticity</b> 1. the nature of heteroscedasticity 2. the consequences of heteroscedasticity 3. detecting heteroscedasticity <b>Autocorrelation</b> the nature of autocorrelation the consequences of autocorrelation detecting autocorrelation: Durbin Watson test <b>Model Specification</b> 1. Formulating a Model 2. Attributes of a Good Model 3. Types of Specification Errors 4. Detecting Specification Errors 5. Summary	11.1 11.2 11.3 12.1 12.2 12.3 13.1 13.1 13.2 13.3 13.5	10.7.2  10.7.1

## 11. Workload

Students are expected to devote twelve hours each week to ECON141, including attendance at Lectures, Tutorials and Computing Practicals.

## 12. Calculators

Some numerical calculations may be required in the examinations. A basic calculator is all that will be required to carry out these calculations. Students will be permitted to take **non-programmable calculators only** into the ECON141 examinations.

## 13. ECON141 Web Page

The web address for the Econ141 homepage is:

**<http://online.mq.edu.au/pub/ECON141>**

On this page you will find links to the assignments, the tutorials, announcements and a message/discussion board. You should check the web page at least once a week for new announcements.

## 14. Staff

**Lecturer in Charge:** Roselyne Joyeux      C5C-390      Ph: 9850 8487 (office)  
email: [rjoyeux@efs.mq.edu.au](mailto:rjoyeux@efs.mq.edu.au)

### Lecturers:

#### Day and Evening Streams:

Michael Dobbie	C5C-374	Ph: 9850 8502 (office)
Baiding Hu	C5C-382	Ph: 9850 8495
		email: <a href="mailto:bhu@efs.mq.edu.au">bhu@efs.mq.edu.au</a>

**Tutor in Charge:** Michael Dobbie      C5C-374      Ph: 9850 8502 (office)  
email: [mdobbie@efs.mq.edu.au](mailto:mdobbie@efs.mq.edu.au)

For administrative (non-academic) enquiries, please contact the following staff:

Demi Chung	C5C-312	9850-6479	<a href="mailto:dchung@efs.mq.edu.au">dchung@efs.mq.edu.au</a>
Rebecca Reeve	C5C-312	9850-8409	<a href="mailto:rdreeve@efs.mq.edu.au">rdreeve@efs.mq.edu.au</a>

Students are encouraged to consult staff during consultation hours. Details of consultation times are displayed on office doors of staff and will be announced in lectures.

Roselyne Joyeux  
Lecturer in Charge

**2004 COURSE CALENDAR ECON141**

<b>Week No. Commencing</b>	<b>Lecture Topic</b>	<b>Tutorials and Coursework</b>
<b>1</b> August 2	The Role of Econometrics in Economic Analysis Revision of Basic Statistical Concepts	
<b>2</b> August 9	Statistical Inference	Tutorial Week 2
<b>3</b> August 16	Two-variable Regression Analysis Properties of Least Squares Estimators	Tutorial Week 3 Tutorial solutions discussed in formal tutorial
<b>4</b> August 23	Inference in the simple linear regression model Analysis of Variance and coefficient of determination in the two-variable model Computing in ECON141	Tutorial Week 4 Tutorial solutions discussed in formal tutorial
<b>5</b> August 30	Functional Forms of regression models Test 1 Review	Tutorial Week 5 Computing Practical
<b>6</b> September 6	The Multiple regression model <b>MULTIPLE CHOICE TEST NO. 1</b>	Tutorial Week 6
<b>7</b> September 13	Hypothesis Testing in the Multiple Regression Model	Tutorial Week 7 Tutorial solutions discussed in formal tutorial
<b>MID-SEMESTER BREAK: SATURDAY SEPTEMBER 18 TO TUESDAY OCTOBER 5</b>		
<b>8</b> October 5	Multicollinearity	Tutorial Week 8
<b>9</b> October 11	Dummy Variables Heteroscedasticity	<b>ASSIGNMENT DUE ON Wednesday October 13</b>
<b>10</b> October 18	Autocorrelation Review Test 2	Tutorial Week 10 Tutorial solutions discussed in formal tutorial
<b>11</b> October 25	Autocorrelation Model Specification <b>MULTIPLE CHOICE TEST NO. 2</b>	Tutorial Week 11 Tutorial solutions discussed in formal tutorial
<b>12</b> November 1	A case study: the construction department at Croq' Pain	Tutorial Week 12 Tutorial solutions discussed in formal tutorial
<b>13</b> November 8	Working through an old final Overview and Revision	Tutorial Week 13 Tutorial solutions discussed in formal tutorial
