

**MACQUARIE UNIVERSITY
DIVISION OF EFS**

UNIT OUTLINE

STAT379 Operations Research II

Year and Semester: 2005 Semester 1

Unit convenors: Michael Petersons & Sibba Gudlaugsdottir

Student Resource Centre
Division of Economic & Financial Studies
MACQUARIE UNIVERSITY

Students in this unit should read this unit outline carefully at the start of semester. It contains important information about the unit. If anything in it is unclear, please consult one of the teaching staff in the unit.

LEARNING OUTCOMES

- The learning outcomes of this unit are outlined at the beginning of each section of the printed notes: However there are some generic outcomes which are listed below.

Students must be able to

- Formulate problems involving integers and indicator variables
- Use a computer package to find solutions to formulated problems.
- Interpret output and write up conclusions based on the output which are relevant to the original problem that was posed.
- Solve probabilistic based problems

In addition to the discipline-based learning objectives, all academic programs at Macquarie seek to develop students' generic skills in a range of areas. One of the aims of this unit is that students develop their skills in the following:

Foundation skills of literacy, numeracy and information technology;
Communication skills;
Critical analysis skills;
Problem-solving skills;
Creative thinking skills.

TEACHING AND LEARNING STRATEGY

- Students must attend three lectures each week at which new material is introduced
- Students are expected to have read through the material to be covered using the lecture notes provided in the study guides.
- Students are expected to attend one tutorial class each week for which they have attempted a solution to the homework problems that have been prescribed and during which they will solve any new problems presented under the guidance of the tutor.
- A week-by-week list of the topics to be covered is available at the end of this document.

RELATIONSHIP BETWEEN ASSESSMENT AND LEARNING OUTCOMES

Tutorials

Tutorials will commence in week 2 of the semester.

The tutorials are meant to be a learning exercise. Participation in the tutorials is essential for your understanding of the course content and your ability to solve problems.

Attendance is compulsory and will be monitored. If you miss more than two tutorial classes you may be excluded from the unit resulting in a fail grade.

Before the tutorial each week you should prepare the set of homework problems which will handed out in the previous weeks lecture. During the tutorial the tutor will go through some further problems..

Homework

All homework problems will be handed out in the previous weeks lecture. The homework must be handed in to your tutor during the tutorial in the week they are due. Late homework will not be accepted.

Each homework task requires you to assimilate the procedures, content and methodology covered in the preceding weeks and apply them to solving the problems presented. If you have satisfied all the behavioural objectives for a topic you will be able to successfully complete the homework based on that weeks' topic.

The feedback from the tutor during the tutorial should be used to remediate any part of the subject matter with which you are having difficulty.

Examinations and Test

Class Test

There will be a class test in this unit, worth 10% of total assessment.

The class test will be held in **week 6** in the lecture on
Tuesday 9am LECTURE

You may take into the tests **ONE** A4 page of notes written on **ONE** side only.

Failure to attend the test without relevant documentation to explain the absence will result in zero marks being awarded for the test and the possibility of exclusion from the unit. The class test is **compulsory** and there will be **NO** make up tests.

If you miss the class test you must submit relevant documentation or you may receive a fail grade for the unit. A valid absence will mean your other coursework marks will be scaled up.

The Class Test covers lecture material from weeks 1-5 inclusive and will be of 50 minutes duration.

You should bring to the test a calculator, writing implements and a ruler

Students will be given back their marked class test papers during tutorials in week 8. Solutions to the class test will be summarised in the tutorials in week 8.

The class test will enable you to get feedback and continuing information about your progress in this unit.

Final Examination

The final exam will be closed book and held during the end of year exam session. It will be worth 90% of the total assessment, and will cover the whole semesters work.

Summary of Assessment	
Test	10%
Final Exam	90%

NOTE: To obtain a passing grade in the course a **satisfactory performance** will be required **in the final exam** irrespective of any marks gained during the semester.

Evidence from your test and tutorial attendance will be used in determining the final grades.

The final examination enables you to display your assimilation and understanding of the behavioural objectives for each topic and to demonstrate your analytic skills in identifying the statistical methods appropriate to solving problems in a wider context. The Examination period in First Semester commences on 15th June.

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations.

<http://www.timetables.mq.edu.au/exam>

The only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to consider applying for Special Consideration. **Special consideration will only be granted to students whose performance in all parts of the coursework is satisfactory.**

Information about unavoidable disruption and the special consideration process is available at <http://www.reg.mq.edu.au/Forms/APSCon.pdf>

If a Supplementary Examination is granted as a result of the Special Consideration process the examination will be scheduled after the conclusion of the official examination period.

You are advised that it is Macquarie University policy not to set early examinations for individuals or groups of students. All students are expected to ensure that they are available until the end of the teaching semester, that is the final day of the official examination period.

PLAGIARISM

The University defines plagiarism in its rules: "Plagiarism involves using the work of another person and presenting it as one's own." Plagiarism is a serious breach of the University's rules and carries significant penalties. You must read the University's practices and procedures on plagiarism. These can be found in the *Handbook of Undergraduate Studies* or on the web at: <http://www.student.mq.edu.au/plagiarism/>

The policies and procedures explain what plagiarism is, how to avoid it, the procedures that will be taken in cases of suspected plagiarism, and the penalties if you are found guilty. Penalties may include a deduction of marks, failure in the unit, and/or referral to the University Discipline Committee.

UNIVERSITY POLICY ON GRADING

Academic Senate has a set of guidelines on the distribution of grades across the range from fail to high distinction. Your final result will include one of these grades plus a standardised numerical grade (SNG).

On occasion your raw mark for a unit (i.e., the total of your marks for each assessment item) may not be the same as the SNG which you receive. Under the Senate guidelines, results may be scaled to ensure that there is a degree of comparability across the university, so that units with the same past performances of their students should achieve similar results.

It is important that you realise that the policy does not require that a minimum number of students are to be failed in any unit. In fact it does something like the opposite, in requiring examiners to explain their actions if more than 20% of students fail in a unit.

The process of scaling does not change the order of marks among students. A student who receives a higher raw mark than another will also receive a higher final scaled mark.

For an explanation of the policy see

<http://www.mq.edu.au/senate/MQUonly/Issues/Guidelines2003.doc> or

<http://www.mq.edu.au/senate/MQUonly/Issues/detailedguidelines.doc>.

STUDENT SUPPORT SERVICES

Macquarie University provides a range of Academic Student Support Services. Details of these services can accessed at <http://www.student.mq.edu.au>.

SCHEDULE

Week	Commencing	TOPIC	CHAPTER	Homework Due or TEST
1	28 February	Inventory Models	15 + 279 revision	
2	7 March	Inventory Models	16	Homework 1
3	14 March	Inventory Models	16	Homework 2
4	21 March	Markov Process	30 -6 th Ed	Homework 3
5	28 March	Game Theory	28 -6 th Ed	No tutorials
6	4 April	Game Theory	28 -6 th Ed	Test in lecture
7	11 April	Integer Programming	11.1+ Lecture Notes	Homework 4
Mid Semester Break				
8	2 May	Integer Programming	11.1+ Lecture Notes	Homework 5
9	9 May	Integer Programming	11.1 + Lecture Notes	Homework 6
10	16 May	Decision Making	6 + Lecture Notes	Homework 7
11	23 May	Decision Making	6 + Lecture Notes	Homework 8
12	30 May	Decision Making	5+ Lecture Notes	Homework 9
13	6 June	Review
