

ECON490 – ECON861

Advanced Macroeconomics

This unit covers both theoretical and empirical applications. Topics include: long-term growth, unemployment, fluctuations in consumption and investments, and stabilisation policies. A special emphasis is given to macroeconomic policies relevant to Australia, such as current account imbalances and the determination of the exchange rate. The course follows the recommended text, though journal articles are covered on a weekly basis.

Recommended text: P.B. Sorensen and H.J. Whitta-Jacobsen – Introducing Advanced Macroeconomics (2005), McGraw Hill

Credit Points: 3
Contact Hours: 3
When Offered: Thursday, S2
Staff Contact: Dr Massimiliano Tani (room 442, E4A), x8499
Assessment: Analytical summaries and presentation (best 2: 10%),
Mid-term test – Week 5 (20%)
Final test – Week 12 (30%)
Project (literature review) (40%)
Offered By: [Department of Economics](#)

Assessment:

1. Analytical summaries: 500 words (= 2 pages max) summary of key articles addressing:
 - a. Key question
 - b. Relationship to existing literature
 - c. Methodology/model
 - d. Data and empiricsPresentation in tutorial attracts either a neutral or a +.
2. Mid-term test: week 6 – one hour, two problems open text test covering growth;
3. Final test: week 12 – 1.5 hour, three problems open text covering business cycle;
4. Project: up to 3,000 words literature review (excluding references and appendices) on topics of choice. Must be handed in on or before the end of the lecture on week 10.
5. There is no final exam.

Course structure:

UNIVERSITY POLICY ON GRADING

Academic Senate has a set of guidelines on the distribution of grades across the range from fail to high distinction. Your final result will include one of these grades plus a standardised numerical grade (SNG). On occasion, your raw mark for a unit (i.e., the total of your marks for each assessment item) may not be the same as the SNG which you receive. Under the Senate guidelines, results may be scaled to ensure that there is a degree of comparability across the university, so that units with the same past performances of their students should achieve similar results. The process of scaling does not change the order of marks among students. A student who receives a higher raw mark than another will also receive a higher final scaled mark.

For an explanation of the policy see: <http://www.mq.edu.au/senate/MQUonly/Issues/Guidelines2003.doc> or <http://www.mq.edu.au/senate/MQUonly/Issues/detailedguidelines.doc>

PLAGIARISM

The University defines plagiarism in its rules: "Plagiarism involves using the work of another person and presenting it as one's own". Plagiarism is a serious breach of the University's rules and carries significant penalties. You must read the University's practices and procedures on plagiarism. These can be found on the web at: <http://www.student.mq.edu.au/plagiarism/>. Penalties may include a deduction of marks, failure in a unit, and/or referral to the University Discipline Committee.
