MKTG 202

MARKETING RESEARCH

UNIT OUTLINE

SEMESTER 2, 2008

Lectures:

Monday, 1:00pm – 4:00pm, W5A- Price Theatre

or

Monday, 6.00pm - 9.00pm, W5A -Price Theatre

Unit Convenor: Con Korkofingas

Prerequisites: MKTG101; ECON111; STAT170

Students in this unit should read the Unit Outline carefully at the beginning of the semester. It contains important information about the unit. If anything in it is unclear, please consult the Unit Convenor.

About This Unit

MKTG202 is a 3-credit point unit.

The marketing concept suggests that marketing is concerned with the satisfaction of customers needs and wants while satisfying organisational goals. A prerequisite for marketers to satisfy customer needs and wants is to possess information about those needs and wants. Additionally, marketers require information about markets, competitors and the external environment. Information about customers, the market and the environment can be utilised by marketers to make optimal marketing decisions and strategies. The information required is typically not immediately available to the marketer and must be generated from data collected from various relevant sources. Marketing research is concerned with the processes used to collect data from these relevant sources, the processes involved in transformation of the raw data input to information output and the processes involved in presenting information that makes the information relevant to marketing decisions.

The unit is primarily designed to introduce students to the main facets of marketing research. Theoretical research techniques are introduced and their application and implementation in practical situations is then presented. Students are expected to be able to apply the theoretical concepts to practical problems. Although, there are statistical concepts that underpin many of the concepts, the emphasis of the unit is more on application and use of the techniques rather than a rigorous examination of statistical methodologies.

Teaching Staff

Con Korkofingas -Convenor (CK) Room E4A-629, X8545

email: ckorkof@efs.mq.edu.au

Consultation hours TBA

Classes

Lecture Times:	Monday 1.00-4.00 pm (day class)
	<u>or</u>
	Monday 6.00-9.00 pm (evening class)

Recommended and/or Required Text

The recommended text is

“Marketing Research (Asia Pacific edition)” Zigmund W.G et al. (ISBN#9780170127349)

Unit Web Page

All announcements and resources will be available on the web site. There are a number of resource materials on the website including lecture slides, practice questions, case studies and practice exam questions for both the within semester and final exams. There is also a forum for student interaction and contact with the lecturers or the convenor. Please consult it at least once a day for messages and updates.

The web page for this unit can be accessed via the 'Login' button on or via <http://learn.mq.edu.au>

The website may be undergoing some reconstruction and reform during the semester to update the site and improve student access to resources. This may cause the website to be down or incomplete for a short while during this process. Your understanding is appreciated.

Learning Outcomes

The learning outcomes of this unit are:

- an understanding of the need for, and uses of, marketing research
- an understanding of the various data gathering techniques relevant for marketing decisions
- an understanding of processes involved in transforming raw data to usable marketing information
- an understanding of application of marketing research techniques in a marketing environment.

In addition to the discipline-based learning objectives, all academic programs at Macquarie University seek to develop students' generic skills in a range of areas. Students should develop skills in the following:

- working in teams
- taking responsibility for the students own learning

Teaching and Learning Strategy

This unit is taught using lectures and tutorials. Students are expected to read in advance of lectures, and participate in all lecture presentations. There is also an applied marketing research project assisting students to apply concepts introduced in lectures to the marketing environment. This will be introduced within the lecture presentations.

Assessment And Relationship Between Assessment And Learning Outcomes

Assessment

The components of assessment are as follows:

Within Semester Examinations	20%
Research Project	30%
Final Examination	50%

Within Semester Examinations

- There will be two examinations held in tutorials in Week 5 (1st September) and Week 12 (3rd November).
- The examinations will be of **50 minutes** duration
- **The within semester examinations will consist of 25 multiple choice questions**
- **For the day lecture, the examinations will commence at 2.50 p.m. and finish at 3.50 p.m.** The first examination will cover all material up to and including lecture material in Week 4
- **In the evening lecture, the examinations will commence at 7.30 p.m. and finish at 8.30 p.m.** The second examination will cover lecture material from Week 5 to Week 10 inclusive.
- **Students will find practice within semester examinations on the MKTG202 website.**

It is important that you come to the class in which you are formally enrolled for your within semester test. Failure to do so may lead to forfeiture of marks obtained in the within semester tests.

Research Project

All students are to complete a major research project (in groups) involving collation and presentation of marketing data, designing research proposals and questionnaires and presentation of reports on marketing research. The assessment mark for a student in the research project will be the mark awarded to the group provided the student has contributed equally to the group effort. A peer assessment review may be used to determine the contribution of each student to the group work. Most of the tutorials in the unit will be concerned with the research project. Students will need to form groups and register these groups with the business department administrator Yang Yang via the website. She can be contacted if there are problems at (yyang@efs.mq.edu.au)

The exact details of the project will be given later in the semester.

Final Examination:

This will be of 3 hours duration and will cover all material in the course.

The examination will consist of three parts;

<i>PART 1</i>	<i>Multiple Choice (30 questions)</i>	<i>45%</i>
<i>PART 2</i>	<i>Short Answer / Calculation (4 out of 6)</i>	<i>40%</i>
<i>PART 3</i>	<i>Case Study / Research Applications (1 out of 2)</i>	<i>15%</i>

- The final examination will cover **all** material in the course. The research project materials are examinable.
- The case studies will be unseen case studies. These unseen case studies will be similar in format (although not the same as) the case studies contained on the website

NOTE:

In order to pass the course you must achieve;

1. An overall satisfactory performance in the total assessment

2. An overall satisfactory performance in the examination components of the course

Class Schedule:

Lecture Date	Topic	Reading	Notes
1 4/8	Introduction	Ch 1, 3	
2 11/8	Market Information Systems. Exploratory Research	Ch 2, 4 Ch 5 - 6	<u>Additional Material</u> Marketing Information Systems
3 18/8	Exploratory Research Secondary Data	Ch 5 - 6 Ch 7 - 8	
4 25/8	Survey Methods	Ch 9 - 11	<u>Additional Material</u> Secondary Data/Desktop Research
5 1/9	Measurement Issues	Ch 13 - 14	<u>First within Semester examination this week</u> (Day 2.50-3:50 pm Evening 7.30-8:30pm)
6 8/9	Questionnaire Design Issues	Ch 15	<u>Additional Material</u> Introduction to Research project
7 15/9	Sampling	Ch 16-17	<u>Additional Material</u> Research project
	SEMESTER		BREAK
8 6/10	<u>No Lecture- Public Holiday</u>		
9 13/10	Data Analysis	Ch 22 - 24	<u>Additional Material</u> Research project
10 20/10	Data Analysis (cont)	Ch 22 - 24	<u>Additional Material</u> Research project
11 27/10	Data Analysis (cont)	Ch 22 - 24	
12 3/11	Data Analysis (cont)		<u>Second within Semester examination this week</u> (Day 2.50-3:50 pm Evening 7.30-8:30pm)
13 10/11	Other Applications, Review		<u>Additional Material</u> Research project

Raw Mark and Grade Meanings

To assist students to interpret the meaning of the raw mark on assignments the following information is provided:

Range of Marks

(max 10)

0 - 4	Work is below the required standard. A major effort should be made to improve the quality of the work.
4.5	A marginal effort, has important weaknesses which require further attention.
4.5 – 6.5	A sound level of work with no major shortcomings. Meets the expected level of work at this unit level.
7 -8	Displays academic excellence in some areas, but with limitations in scope and ability to sustain a position.
8.5-10	Work is among the highest quality produced by students at the level of this unit.

Final Grades:

The final mark and grade awarded to students will be assessed on the following criteria:

- HD. Denotes performance which meets all unit objectives in such an exceptional way and with such marked excellence that it deserves the highest level of recognition.
- D. Denotes performance which clearly deserves a very high level of recognition as an excellent achievement in the subject.
- CR. Denotes performance which is substantially better than would normally be expected of competent students in the unit.
- P. Denotes performance which satisfies unit objectives.
- PC. Denotes performance which meets unit objectives only marginally, and which is therefore unlikely to be adequate preparation for further study in the area.
- F. Denotes performance which does not meet unit objectives.

The raw mark will not necessarily be exactly the same as the final mark awarded. Raw marks may be scaled according to normal statistical procedures.

Note that the total raw mark a student has achieved will not necessarily be indicative of the grade the student obtains. At the final tabulation stage, consideration will be given to individual student performance in all aspects of assessment but especially in the examination components and the above criteria for a grade will apply. Student raw marks may then be adjusted to reflect the grade awarded

#All students are required to perform satisfactorily in the final examination to obtain a passing grade for the unit. The combined performance of the student in the examination components of the course will be a prime determinant of the student's final grade in this unit. **In the case that a student has not achieved a satisfactory performance in the examination components, then the final mark awarded will be indicative of that examination performance ie marks in other assessment tasks will be weighted differently in the final mark.**

Formal Examination Procedures

The University examination period in the second semester 2008 is from 19 November to 5 December.

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations.

<http://www.timetables.mq.edu.au/exam>

The only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to consider applying for Special Consideration. Information about unavoidable disruption and the special consideration process is available at

<http://www.reg.mq.edu.au/Forms/APSCon.pdf>

If a Supplementary Examination is granted as a result of the Special Consideration process the examination will be scheduled after the conclusion of the official examination period.

You are advised that it is Macquarie University policy not to set early examinations for individuals or groups of students. All students are expected to ensure that they are available until the end of the teaching semester, that is the final day of the official examination period.

Plagiarism

The University defines plagiarism in its rules: "Plagiarism involves using the work of another person and presenting it as one's own." Plagiarism is a serious breach of the University's rules and carries significant penalties. You must read the University's practices

and procedures on plagiarism. These can be found in the *Handbook of Undergraduate Studies* or on the web at: <http://www.student.mq.edu.au/plagiarism/>

The policies and procedures explain what plagiarism is, how to avoid it, the procedures that will be taken in cases of suspected plagiarism, and the penalties if you are found guilty. Penalties may include a deduction of marks, failure in the unit, and/or referral to the University Discipline Committee.

University Policy on Grading

Academic Senate has a set of guidelines on the distribution of grades across the range from fail to high distinction. Your final result will include one of these grades plus a standardised numerical grade (SNG).

On occasion your raw mark for a unit (i.e., the total of your marks for each assessment item) may not be the same as the SNG which you receive. Under the Senate guidelines, results may be scaled to ensure that there is a degree of comparability across the university, so that units with the same past performances of their students should achieve similar results.

It is important that you realise that the policy does not require that a minimum number of students are to be failed in any unit. In fact it does something like the opposite, in requiring examiners to explain their actions if more than 20% of students fail in a unit.

The process of scaling does not change the order of marks among students. A student who receives a higher raw mark than another will also receive a higher final scaled mark.

For an explanation of the policy see

<http://senate.mq.edu.au/rules/Guidelines2003.doc>

<http://senate.mq.edu.au/rules/detailedguidelines.doc>.

Student Support Services

Macquarie University provides a range of Academic Student Support Services. Details of these services can be accessed at <http://www.student.mq.edu.au>.

Classroom Etiquette

Students are expected to arrive on time, certainly before five minutes past the hour, and not to leave until the class ends. If you have a recurring problem that makes you late, or forces you to leave early, have the courtesy to discuss this with your lecturer/tutor.

Students are expected to be quiet during lectures unless, of course, class participation is required. Mobiles should be turned off during classes; not simply set to “silent”.
