

**MACQUARIE UNIVERSITY
DIVISION OF ECONOMICS AND FINANCIAL STUDIES
STAT271: STATISTICS
UNIT OUTLINE**

Year and Semester: Second semester, 2008
Lecturer-in-charge: Dr Jun Ma
Prerequisites / Corequisites: STAT272 (P)

Students in this unit should read this unit outline carefully at the start of semester. It contains important information about the unit. If anything in it is unclear, please consult one of the teaching staff in the unit.

ABOUT THIS UNIT

This is a 3 credit-point unit. This unit studies basic issues of statistics. Techniques discussed in this unit are absolutely necessary for modern statistical data analysis.

TEACHING STAFF

Dr Jun Ma (weeks 1 – 4)
Room: E4A530
Telephone: (02) 9850-8548, Fax: (02) 9850-7669
Email: jun.ma@mq.edu.au
Consulting hours: TBA

Ms Suzanne Curtis (weeks 5 – 13)
Room: E4A549
Telephone: (02) 9850-8584, Fax: (02) 9850-7669
Email: scurtis@efs.mq.edu.au
Consulting hours: TBA

CLASSES

Lectures

There are three lectures per week; the times are as stated in the timetable:

Monday	2.00 – 3.00 pm	C5C T1
Wednesday	11.00 – 12 am	W5A PRICE
Thursday	10.00 – 11 am	W5A PRICE

Tutorials

Students are expected to attend one tutorial per week, commencing in the second week of lectures. Until Thursday of week 1 (2nd August), tutorial changes may be done at any of the change-of-program sessions, or using the University administered web facility. Otherwise students should contact the lecturers.

REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS

Students are expected to have access to a copy of the prescribed text book throughout the semester. Copies of the text book and student solution manual are held in Special Reserve in the University Library.

Mendenhall W, Wackerly D and Scheaffer R. QA276.M426_2000
“Mathematical Statistics with Applications”, Sixth Edition

The Library also holds copies of the Fifth Edition of the text book (QA276.M426/1996) and the Student solutions manual by Charles D. Kincaid.

UNIT WEB PAGE

The unit web page is available at the university online learning site. You can log in via <http://learn.mq.edu.au>

LEARNING OUTCOMES

Our aim in this unit is to familiarize you with the modern concepts and procedures of statistical analysis, especially *parametric estimation, hypothesis testing, ANOVA and regression*.

In addition, we also emphasise the following generic skills in this unit, namely

- *Problem-solving skills;*
- *Creative thinking skills.*

TEACHING AND LEARNING STRATEGY

This unit is taught via lectures and tutorials, each of which students **are required to attend**.

TOPICS

- 1 Point estimation methods, including the method of moments and maximum likelihood. Properties of estimators. Asymptotic (large sample) properties.
- 2 Sampling distributions and properties of sample statistics. Definition and derivation of t, F and χ^2 distributions.
- 3 Interval estimation. Confidence intervals.
- 4 Principles of hypothesis testing. Type I & II errors. Power. Comparison of competing tests. Relationship between confidence intervals and hypothesis testing.
- 5 Confidence intervals and hypothesis testing for the probability parameter in the binomial distribution.
- 6 Confidence intervals and hypothesis testing in the single-sample case, including related samples (paired comparisons). Both classical (normal theory) and nonparametric tests are considered.
- 7 Confidence intervals and hypothesis testing in the two-sample case, including the test for equality of variances. Both classical (normal theory) and nonparametric tests are considered.
- 8 χ^2 tests. Both goodness of fit tests and tests of association are covered.
- 9 One-way analysis of variance – the generalisation of two-sample problems to more than two samples. Both classical (normal theory) and nonparametric tests are covered.
- 10 Two-way analysis of variance. Contrasts. Multiple comparisons. Both classical (normal theory) and nonparametric tests are covered.
- 11 Simple linear regression. Multiple linear regression, including polynomial curve fitting. R^2 and its interpretation.

Students should read the lecture notes, which will be available at the unit web page, before the lecture.

ASSESSMENT

Grades awarded to students will be based on their performance in the assignments and examination. Assessment will be on the following basis:

Assignments	20%
Final examination	80%

In order to pass the unit you must demonstrate satisfactory performances in **all** aspects of assessment.

Assignments

Assignments are a major part of the learning process. There will be four assignments, which are to be submitted to your tutor in the tutorials in weeks **3, 6, 9 and 12** (note that all tutorials are on Monday).

Assignments are compulsory. Failure to submit assignments on time may result in automatic exclusion from the unit in accordance with Bachelor Degree Rule 10(1).

Assignments must be each student's own work. Discussions are allowed but the final work must be your personal effort.

Final Examination

A non-programmable calculator and **two** A4 sheets of notes (must be handwritten and possibly on both sides) may be taken into the examination room. The final examination will cover all the materials discussed in this unit.

The University Examination period in the Second Half Year 2008 is from November 19 2008 to December 5 2008.

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations.

<http://www.timetables.mq.edu.au/exam>

Only documented illness or unavoidable disruption may be used as reasons for not sitting an examination at the designated time. In these circumstances you may wish to consider applying for Special Consideration. Information about unavoidable disruption and the special consideration process is available at <http://www.reg.mq.edu.au/Forms/APSCon.pdf> and further information will be available at the EFS website <http://www.efs.mq.edu.au> near the end of semester.

If a Supplementary Examination is granted as a result of the Special Consideration process the examination will be scheduled after the conclusion of the official examination period.

You are advised that it is Macquarie University policy not to set early examinations for individuals or groups of students. All students are expected to ensure that they are available until the end of the teaching semester, which is the final day of the official examination period.

PLAGIARISM

The University defines plagiarism in its rules: "Plagiarism involves using the work of another person and presenting it as one's own." Plagiarism is a serious breach of the University's rules and carries significant penalties. You must read the University's practices and procedures on plagiarism. These can be found in the *Handbook of Undergraduate Studies* or on the web at:

<http://www.student.mq.edu.au/plagiarism>

The policies and procedures explain what plagiarism is, how to avoid it, the procedures that will be taken in cases of suspected plagiarism, and the penalties if you are found guilty. Penalties may include a deduction of marks, failure in the unit, and/or referral to the University Discipline Committee.

UNIVERSITY POLICY ON GRADING

Academic Senate has a set of guidelines on the distribution of grades across the range from fail to high distinction. Your final result will include one of these grades plus a standardised numerical grade (SNG).

On occasion your raw mark for a unit (i.e., the total of your marks for each assessment item) may not be the same as the SNG which you receive. Under the Senate guidelines, results may be scaled to ensure that there is a degree of comparability across the university, so that units with the same past performances of their students should achieve similar results.

It is important that you realise that the policy does not require that a minimum number of students are to be failed in any unit. In fact it does something like the opposite, in requiring examiners to explain their actions if more than 20% of students fail in a unit.

The process of scaling does not change the order of marks among students. A student who receives a higher raw mark than another will also receive a higher final scaled mark.

For an explanation of the policy see <http://senate.mq.edu.au/rules/detailedguidelines.doc>

STUDENT SUPPORT SERVICES

Macquarie University provides a range of Academic Student Support Services. Details of these services can be accessed at <http://www.student.mq.edu.au>.
