Unit Code: ACCG251

Unit Name: Accounting and Information Systems

Year and Semester: 2010, Semester 2

Unit convenor: Dr. Babak Abedin

Prerequisites: ACCG101(P) or ACCG105(P) and 18 credit points

Credit points: 3 credit points

Students in this unit should read this unit outline carefully at the start of semester. It contains important information about the unit. If anything in it is unclear, please consult one of the teaching staff in the unit.

ABOUT THIS UNIT

This unit is worth three credit points and will introduce students to the area of accounting information systems. The topics covered in this unit include the key discipline based areas of the role of accounting and accounting information systems, databases, e-business systems, internal controls, business processes, ethics, systems development and information system audit. The material covered in this course is presented through an accounting lens, thus allowing the full benefits of information systems within a practical and relevant context to be drawn out and evidenced to students. This makes the course more than just ‘how to use computers’. Rather, the emphasis is placed on students appreciating the critical role that information systems play in supporting the accounting function, and the need for a critical nexus between the accounting and information systems functions. This unit also provides the foundation for the student’s further studies in the accounting / accounting information systems disciplines. Particularly, as a pre-requisite for the core unit ACCG 340 Auditing and Assurance services.

TEACHING STAFF

The details for the teaching staff on ACCG 251 are outlined below. Please note the specified staff consultation hours. Ordinarily, staff would not expect to be contacted outside these designated hours.

**CONCLUSION**

Consultations start from week 3. The consultation timetable with all staff’s contact details and consultation time will be available on Blackboard in Week 2. You are encouraged to seek help at a time that is convenient to you from a staff member teaching on this unit during their regular consultation hours. In special circumstances, an appointment may be made outside regular consultation hours. **Staff will not conduct any consultations by e-mail.**

In order to gain access to staff located at levels 1, 2 and 3 of building E4A during their consultation hours please ring the staff member from the phones available in the lobby (phone numbers of relevant staff members will be provided on Blackboard and are available next to the phones).

Students experiencing significant difficulties with any topic in the unit are strongly to seek assistance immediately.

**CLASSES**

You are able to access details of scheduled classes through the university’s timetable facility (http://www.timetables.mq.edu.au). Provisional lecture times are listed as follows:

- **Tuesdays** 3:00pm to 5:00pm  W5A PRICE
- **Thursdays** 3:00pm to 5:00pm  X5BT1

**It is your responsibility to check your timetable allocations (lecture and tutorial times) and ensure that you attend the stream of classes in which you are enrolled in.** The weekly lectures are recorded and are available through iLecture.

As a guide, your working week for ACCG 251 should consist of the following time commitments:

- Lecture 2 hours/week
- Tutorial 1 hour/week
- PAL (Optional) 1 hour/week
- Reading / preparation / independent study 6 hours/week
Since ACCG 251 relies on students being able to apply concepts, this will mean you may have to allocate more time to your own understanding of the subject material (ie completing reading, note taking, talking with peers). Students are also strongly encouraged to participate in the PAL program.

Public Holidays

The only scheduled public holiday (Labour Day) during Semester 2 2010 occurs on Monday 4 October. This holiday is not affecting this unit, as there is no ACCG251 tutorial or lecture on Mondays.

Prizes

The following prizes are available for this unit:

- Ernst & Young Prize for proficiency in the unit ACCG251, Accounting and Information Systems
- The Macquarie University Accounting and Finance Prize for ACCG251 - Accounting and Information Systems
- KPMG Accounting Academic Prize for 2nd year ACCG units
- ACCA Prize for best student in Accounting and Information Systems - Awarded for ACCG251

Further details can be found on the FBE’s website

http://www.businessandeconomics.mq.edu.au/undergraduate_degrees/prizes_scholarships

Required and Recommended Texts and/or Materials

You will require access to the following texts:

- QuickBooks Notes and Examples (access details to be provided via Blackboard- Only available to students enrolled in ACCG 251)

Recommended Texts

  (You will require the CD if you wish to use the QuickBooks program on your own computers.)

Copies of the textbook and the QuickBooks CD can be purchased from the Co-Op bookstore on campus. Some copies of the text are also available through the closed reserve in the library.
**TECHNOLOGY USED AND REQUIRED**

This unit will use **Blackboard** as an online technology for students to access course material, announcements as well as any other documents related to this unit. Students are required to regularly check the Blackboard for accessing up-to-date information about the unit. Blackboard is available via the link below. Students need to have username and password to access Blackboard.  
https://learn.mq.edu.au

**iLecture** is a multi-media learning tool that provides an audio of the lectures which students can download and listen to at their convenience. iLecture will be made available at the end of each Thursday via Blackboard. Along with the audio downloads, students will have the option to view a video of the ACCG251 lecture content  
http://www.mq.edu.au/ltc/technologies/ilecture/video_students.htm

**E-Reserve:** students can find extra readings on a link on Blackboard, called e-Reserve. Some of these extra readings will be used for tutorial activities and lecture content. Students need to download all relevant information to complete their tutorial questions and their learning objectives.

**LEARNING OBJECTIVES**

The learning objectives of this unit are:

1. To enable students to be able to perform information systems functions from an accounting perspective.
2. To improve the ability of students in analyzing case studies and conceptual thinking on accounting information systems issues.
3. To improve the problem solving skills of students.
4. To critically evaluate an organizational situation for its accounting information systems issues.
5. To be able to apply relevant computer based skills through the use of an accounting package.

**LEARNING OUTCOMES**

Having completed this subject, students should be able to:

1. Appreciate the role of information systems in general, and accounting information systems specifically, in supporting the operations of an organization.
2. Understand the importance and benefits of systems development methodologies.
3. Prepare and interpret system documentation.
4. Apply internal control techniques to business processes.
5. Examine the role of ethics and ethical decision making within the accounting information systems context.
6. Demonstrate the ability to use an accounting package.
GRADUATE CAPABILITIES

In addition to the discipline-based learning objectives, all academic programs at Macquarie seek to develop the capabilities the University's graduates will need to develop to address the challenges, and to be effective, engaged participants in their world. This unit contributes to this by developing the following graduate capabilities:

1 Discipline Specific Knowledge and Skills
   a) Capable of Applying Information Systems Knowledge to the Accounting Context
   b) Commitment to Maintain Privacy and Security of Information
   c) Commitment to Analyse and Apply Internal Controls
   d) Ability to Use an Accounting Software

2 Critical, Analytical and Integrative Thinking

3 Effective Communication

4 Engaged and Ethical Local and Global citizens

5 Capable of Professional and Personal Judgement and Initiative

6 Commitment to Continuous Learning

TEACHING AND LEARNING STRATEGY

This unit will be taught in the form of weekly lectures and tutorials. Students are required to enrol in one lecture and one tutorial for this unit. The teaching strategies are outlined below:

Lectures

A two hour lecture will be offered twice a week on Tuesdays (15:00-17:00 in W5A PRICE) and Thursdays (15:00-17:00 in X5B T1). Due to venue capacity constraints, students need to attend the lecture in which they are enrolled. Students need to download their lecture slides from Blackboard prior to attending the lecture. It is expected that students complete their prescribed reading for the week prior to attending the lecture. A recording of each Thursday's lecture will be available for students to download from iLectures (via Blackboard).

Tutorial Activities

Tutorials start in week 2 and are based on the previous week's lecture topic. Students are required to enrol in tutorials on-line. Tutorials enrolment will be closed after the first week of semester. Students must only attend their scheduled lecture and tutorial. If students wish to change tutorials after week 1, they need to attain written approval. Students then need to print this approval and show it to their new tutor.

Each week students will be given a tutorial task, which will be available through the subject's Blackboard site. The tutorial activities are focused on case study analysis. Students are expected to READ the case studies prior to their tutorials in order to enhance quality of class discussion. In addition, collaborative learning is also an important element of the learning process in this subject. Student's interactive
learning techniques such as group discussion, role-playing, self-assessment and peer-assessment are also applied in the tutorials throughout the semester.

Tutorial Attendance
Students are expected to attend a **minimum of 10 out of 12 tutorials**. As tutorials will be mainly based on group activities, it is expected that all students arrive before the first 5 minute of the class. If you miss a tutorial due to misadventure or illness then you must submit an Advice of Absence form (available from http://www.businessandeconomics.mq.edu.au/for/new_and_current_students/undergraduate/how_do_i/absences), with the necessary supporting documentation. The form should be completed and submitted to BESS (E4B106) within five (5) working days of the affected tasks. Absences from tutorials supported by an Advice of Absence form might be accepted.

Tutorial answers
The aim of tutorials, indeed that of the subject overall, is for you to develop higher order skills that you are able to apply in a range of contexts. As such, the memorization of tutorial answers and definitions from the text will not be adequate for you to pass this subject. Accordingly, tutorial solutions will not be released on the subject website. A suggested strategy for dealing with the subject material is as follows:

- Attend lectures each week and make notes, review lectures on iLecture if necessary
- Prepare for tutorials by completing the assigned reading
- Attempt all tutorial questions
- Make a note of any questions you have about the material
- Refer back to readings and lecture notes for potential answers to your questions
- Come along to tutorials prepared and ready to ask questions and contribute to discussions
- If questions are still unresolved then make use of the staff consultation times

Staff consultation should be late in the process - university education is about independence and self guided learning. As such you should first attempt to seek out your own answers to questions by completing readings, thinking about material and discussing concepts with your peers or visiting the library. If you wish to review your answers to tutorial questions then you should make use of the tutor consultation times that are provided. However, as was mentioned above, these should be used when you have a question about the material and have already made a legitimate attempt at answering the question.
**RELATIONSHIP BETWEEN ASSESSMENT AND LEARNING OUTCOMES**

**Peer-assessment task (0%)**
This activity is set to be a peer-assessment task and will be completed in tutorial. The objective of this activity for each student is to provide feedback on another student’s work and to get a better idea on how to improve your answers to questions.

The activity will consist of case study questions relating to specified material from the textbook and lectures. Students will work in pairs and each student will mark his/her partner’s case study questions in tutorial.

**Online quiz (5%)**
This activity is set to be a diagnostic task for students. The quiz is to be completed through a link that will be made available on the unit’s Blackboard page. *Students need to ensure that they have access to Blackboard in order to be able to access and complete the test*. The online tests will only be open for the specified period of time. Students who do not complete the tests in the specified time period will be assumed to have not attempted the task, and receive a grade of zero. **You are only allowed 1 (one) attempt at the quiz.**

Students MUST submit their answers via the ACCG251 website, which can be accessed through the Macquarie University Online Teaching Facility (MUOTF) at the following address: http://learn.mq.edu.au/. **It is strongly recommended that students use computers at the University laboratories for the online quiz to prevent technical problems that may occur as a consequence of using your home computers such as slow speed Internet connectivity.** You may access the online quiz using your home computers at your own risk.

**Case study assignment (15%)**
Students will be given a set of short-answered questions as well as case studies on System Development and Controls. The assignment must be completed individually. Students are expected to perform critical analysis of the case and relate the case to theories covered in lectures and tutorials.

Please note the following details regarding the case study assignment:

- **Topics covered:** Lectures 1 to 6
- **The assignment should be typed and a complete assignment cover sheet attached.** **Assignments with no FBE cover sheet will attract a ten percent (10%) penalty of the maximum mark available** (ie 1.5 marks out of 15). The FBE cover sheet could be obtained from the following link: [http://www.businessandeconomics.mq.edu.au/faculty_docs/student_support/Individual_cover_sheet.pdf](http://www.businessandeconomics.mq.edu.au/faculty_docs/student_support/Individual_cover_sheet.pdf)
- **If a student is unable to attend their tutorial due to illness or misadventure, the student should contact their tutor and provide proof of such a circumstance (eg. medical certificate covering absence date and subsequent days until submission).** The assignment, documentary evidence and supporting forms should be submitted via BESS. No penalty will apply if the evidence provided is approved by the Unit Convenor and **covers the entire period prior to**
submission. Submissions via BESS that do not comply with these requirements will attract the standard penalty. Students should also attach the appropriate absence form with their assignment: http://www.businessandeconomics.mq.edu.au/for/new_and_current_students/undergraduate/how_do_i/absences

- Assignments that do not comply with these requirements may not be accepted or marked.

- The policy statement on cheating and plagiarism is a cornerstone of academic integrity at Macquarie University. All students are responsible for familiarizing themselves with the policy, seeking further advice if necessary and complying with it at all times. If you use any material, for example textbooks, journal articles, etc, to support your answer, you are to use the Harvard Style of referencing in your answer for both in-text and bibliography referencing.

- Students could seek further feedback on the marking of their individual assignment from their tutor during their regular consultations. Appeals for internal assessments should be undertaken within two weeks of each assignment’s return date. Appeal requests after two weeks of return’s date may not be accepted.

**Independent Learning – QuickBooks (20%)**

The QuickBooks assignment provides you with a real world example of an accounting information system. It is intended that QuickBooks learning will be self-guided. By working through the QuickBooks assignment it is intended that you will:

- Familiarise yourself with the operation of a commercial accounting package
- Be able to record standard transactions
- Be able to prepare basic reports
- Identify examples of the theory and lecture material in the practical operation of QuickBooks (i.e. to think about how the theory is put into practice in a commercial accounting application).

The general skills acquired through the completion of the assignment include:

- Being able to act as an independent, responsible, self directed learner
- Familiarisation with the use of an accounting information system
- Building your experience base with popular AIS applications, like QuickBooks
- Apply accounting knowledge and competencies acquired from prerequisite unit to the AIS domain

Please note the following details regarding QuickBooks assignments:

- Full details of the assignment (assignment objectives, question material,
requirements etc) will be made available through the subject’s Blackboard site.

- Students must totally rely on the online material that will be available on Blackboard as teaching staff will not respond to any questions regarding the use of the software to complete the assignment.

- Students need to note that the QuickBooks assignment will be marked electronically, so it is very important to use the prescribed software only and comply with all the instructions in the case. A failure to do so may result in a zero mark being awarded.

- Each student will receive by E-mail to their official Macquarie Student E-mail address, an Excel workbook with their unique assignment. Students will be required to access the server to obtain their unique QuickBooks file (see file instructions from Blackboard). Thus, it is very important for you to activate and regularly access your student email address.

**Final Exam (60%)**

A three hour final examination for this unit will be held during the University Examination period. The final exam assesses students’ critical thinking capabilities as well as the ability to apply their knowledge of accounting and information systems to examples of real world problems and cases.

The University Examination period in Second Half Year 2010 is from 15 November 2010 to 3 December 2010.

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations.

http://www.timetables.mq.edu.au/exam

The only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to consider applying for Special Consideration. The University’s policy on special consideration process is available at http://www.mq.edu.au/policy/docs/special_consideration/policy.html

If a Supplementary Examination is granted as a result of the Special Consideration process the examination will be scheduled after the conclusion of the official examination period. (Individual Faculties may wish to signal when the Faculties’ Supplementary Exams are normally scheduled.)

The Macquarie university examination policy details the principles and conduct of examinations at the University. The policy is available at: http://www.mq.edu.au/policy/docs/examination/policy.htm
Further details about the final exam for the subject will be made available in the final week of lectures.

**GRAD**

All final grades in the Department of Accounting and Finance are determined by a grading committee and are not the sole responsibility of the Unit Coordinator.

Macquarie University’s Academic Senate has a set of guidelines on the distribution of grades across the range from fail to high distinction. Your final result will include one of these grades plus a Standardised Numerical Grade (SNG)

The Standardised Numerical Grade (SNG) is not a summation of the individual assessment components.

To be awarded a specific grade, students are required to perform at an equivalent standard in the final examination and their overall assessment marks in the unit.

Please also refer to relevant pages in the Handbook of Undergraduate Studies
CLASSROOM ETIQUETTE

Your attention is drawn to the following principles of classroom etiquette, which will be observed during the semester.

Lectures
Students are expected to:
• Remain quiet during lectures unless class participation or discussion is specifically requested / required.
• Ensure mobile phones are switched off upon entering the lecture theatre.
• Arrive on time for the lecture (before five minutes past the hour) and to remain until the class is formally concluded.

Tutorials
Students are expected to:
• Ensure mobile phones are switched off upon entering the tutorial room.
• Arrive on time for the tutorial (before five minutes past the hour) and to remain until the class is formally concluded.
• Inform the tutor, prior to the tutorial commencing if possible, of any anticipated or unavoidable absence or need to exit a tutorial early.
• Come to tutorials having prepared for the class. This includes a familiarity with the subject matter and being willing to discuss ideas, offer suggestions, ask questions and engage with your peers in a collegial manner.
• Give their attention and respect to any person who is presenting or contributing to the tutorial session (student or tutor).

ACADEMIC HONESTY

The nature of scholarly endeavour, dependent as it is on the work of others, binds all members of the University community to abide by the principles of academic honesty. Its fundamental principle is that all staff and students act with integrity in the creation, development, application and use of ideas and information. This means that:

- all academic work claimed as original is the work of the author making the claim
- all academic collaborations are acknowledged
- academic work is not falsified in any way
- when the ideas of others are used, these ideas are acknowledged appropriately.

Further information on the academic honesty can be found in the Macquarie University Academic Honesty Policy at http://www.mq.edu.au/policy/docs/academic_honesty/policy.html
**GRADING APPEALS AND FINAL EXAMINATION SCRIPT VIEWING**

If, at the conclusion of this unit, you have performed below expectations, and are considering lodging an appeal of grade and/or viewing your final exam script please refer to the following website which provides information about these processes and the cut off dates in the first instance. Please read the instructions provided concerning what constitutes a valid grounds for appeal before appealing your grade.

**SPECIAL CONSIDERATION**

The University is committed to equity and fairness in all aspects of its learning and teaching. In stating this commitment, the University recognises that there may be circumstances where a student is prevented by unavoidable disruption from performing in accordance with their ability. A special consideration policy exists to support students who experience serious and unavoidable disruption such that they do not reach their usual demonstrated performance level. The policy is available at:

http://www.mq.edu.au/policy/docs/special_consideration/procedure.html

If you sat the final exam and are granted a supplementary exam, your original attempt will be disregarded. Your performance in the supplementary exam will replace your performance in the original exam.

DO NOT make holiday or travel plans that would affect your availability for the supplementary exam. If you do not attend a supplementary exam that has been granted then you will receive a FailAbsent (FA) grade for that unit.

If your reasons for requesting special consideration are deemed to be those that are routinely encountered or foreseeable (eg colds, headaches, work commitments etc) your chances of being granted special consideration are low. Each semester, a significant proportion of applications are NOT APPROVED.

**STUDENT SUPPORT SERVICES**

Macquarie University provides a range of Academic Student Support Services. Details of these services can be accessed at http://www.student.mq.edu.au.

**Student Support Services**

There is a wide range of counseling and health services offered through Macquarie University, with the list of services including financial, welfare, counseling and learning support. The aim of these services is to assist students and staff towards their goal of effective and successful study. The Counselling Service aims to assist students with matters which may prevent successful completion of their studies, providing both general counselling and specialist counselling for International Students and students requiring Learning Skills assistance. Information about the Support Services is available at http://www.sss.mq.edu.au
PAL Program
Peer Assisted Learning (“PAL”) classes are being run for ACCG 251. These sessions are being run through BESS and are free of charge. Further information is available from the BESS office in E4B 106. Alternatively, consult the BESS website, which can be found at: http://www.efs.mq.edu.au/student_support/eric.
While participation and attendance at PAL sessions is totally optional and voluntary, students are strongly advised to make use of the opportunity to participate in the PAL program. The benefits of the PAL program are several, not least of which is the extra opportunity to work collaboratively with your peers. This opportunity should not be ignored. In a subject like ACCG 251, where the application of concepts is essential, the opportunity to talk through ideas and concepts in order to enrich your understanding is one that should not be passed up.
PAL works on a collaborative learning model and is intended for students of all abilities. Suggested benefits of the PAL program (as mentioned on the PAL website http://www.efs.mq.edu.au/student_support/eric/peer_assisted_learning) are that it offers the chance to:

• improve your skills;
• get higher grades;
• keep up to date with the course as it progresses through the semester;
• develop your study skills;
• improve your communication and group based skills; and
• enhance your overall experience in ACCG 251.

Further details about the PAL program will be made available in the initial week of lectures.

International student support services
Macquarie University also offers a range of special support services for international students. If you experience study-related difficulties, do not hesitate to contact the International Office. Macquarie University provides a range of Academic Student Support Services. Details of these services can be accessed at http://www.student.mq.edu.au.

IT Conditions of Use
Access to all student computing facilities within the Faculty of Business and Economics is restricted to authorised coursework for approved units. At all times, student ID cards must be displayed in the locations provided. Students are expected to act responsibly at all times when utilising University IT facilities. The following regulations apply to the use of computer labs and online services:

- Accessing inappropriate web sites, or downloading inappropriate material, are not permitted, material that is not related to coursework in units authorised to use these facilities is deemed inappropriate.
- Downloading copyright material without permission from the copyright owner is illegal, and strictly prohibited. Students detected undertaking such activities will face disciplinary action, which may possibly result in criminal proceedings. Non-compliance with these conditions may result in disciplinary action without further notice.
Students are reminded to communicate to staff only through the Macquarie University email as this is the only official channel.
