Dr Kim Hawtrey
Lecturer-in-charge
(khawtrey@efs.mq.edu.au)
1. **COURSE OVERVIEW**

World financial markets and global investment flows form an influential part of today’s economic landscape.

The aim in this course is to talk the language of international finance, identify the key issues, and equip students with core skills for a career in international financial management.

Whilst the course uses the latest techniques and includes a number of case studies, the approach is non-technical.

2. **TEACHING PROGRAM**

Staff for the course (Daytime stream Semester 2):

- Dr Kim Hawtrey
  - Lecturing weeks 1-13
  - (C5C Room 392. Telephone 98508504. Email khawtrey@efs.mq.edu.au)

Enquiries about the subject matter of lectures can be directed to the lecturer in the first instance by email, or by phone or in person. Dr Hawtrey can answer general enquiries about course administration and assessment.

Classes comprise a three-hour block (with hourly 10-minute breaks), held as follows:

- Thursdays 10am - 1pm W5AT2

There are no formal tutorials in this course; each lecture session will incorporate applications and practical exercises to aid understanding of concepts.

3. **COURSEWORK AND ASSESSMENT**

Assessment for ECON867 is based on an assignment and final exam, weighted as shown below:

- Assignment 30%
- Examination 70%

The Assignment (30%) is to be submitted by **8pm sharp Monday 13 October 2003**, and should be lodged in the ECON867 box in ERIC (C5C244).

The assignment TOPIC can be found on page 6 of this unit outline.
Your assignment must be submitted using the official cover sheet (see page 7) with plagiarism declaration signed (page 8). Keep a dated, witnessed copy of your assignment in case of misadventure. Length: 2000 words

Late assignments may or may not be received, at the discretion of the Lecturer-in-charge, and will be subject to a lateness penalty.

After staff processing, marked assignments will be returned to students in Week 13 of semester (they can be collected at ERIC).

The Examination (70%) will be two hours in duration and will consist of a mix of multiple choice and long-answer questions.

The exam will be based on the lecture notes: this is where students should focus their attention. Textbooks and additional readings are optional and will not be required knowledge for the exam.

The examination will aim to test concepts and understanding of principles, rather than detailed application of methods. No mathematical calculations or detailed worked case studies will be required in the exam.

4. ADDITIONAL READING (OPTIONAL)

There is no single text for the course. Students should focus on the material presented in lectures. The exam will be based on lecture notes, not on textbooks or other readings.

If some students wish to read beyond the lecture notes in selected areas to improve their understanding, then the readings below are provided. These are optional.

A basic reference book (optional) is:

Copies of this book are available in the Co-Op bookshop.

Other useful reference texts for the course include:

5. LECTURE TOPICS

**Week 1: Introduction: foreign currency markets**
Provides an overview of the broad features and functions of foreign exchange (FX) markets, especially in the Australian context. How foreign currencies trading operates. Explanation of spot, forward and expected future exchange rates.

**Week 2: International parity: IRP and PPP**
Relates spot and forward exchange rates to international interest rate differentials, a relationship known as 'interest rate parity'. Discussion of covered and uncovered interest parity. Develops the concept of the real, effective exchange rate and the concept of 'purchasing power parity' (PPP). The role of arbitrage in maintaining interest parity relationships.

**Week 3: Modelling the exchange rate**
Deals with the economics of exchange rate determination in the broader macroeconomic context. Factors affecting the equilibrium exchange rate. Approaches to modelling the historical path of the exchange rate.

**Week 4: Currency swaps**
Looks at the economics of international swaps, both interest and currency swaps. The role of swaps in risk-management. Accounting for swaps. Swap spreads. Commodity swaps.

**Week 5: Currency futures**

**Week 6: Currency options**
Exchange rate risk may be hedged through the FX options market. Discussion of types of options, option pricing and strategies.

**Week 7: Measuring currency risk**
Considers risk premia in foreign exchange rates. Methods for measuring the volatility of a single currency. The Value-at-Risk (VAR) methodology for measuring trading book risk. Other relevant risks such as sovereign risk, country risk.

**Week 8: Managing currency exposure**
Defining a firm's currency exposure. Accounting conventions for capturing the firm's exposure. 'Natural' versus 'synthetic' ways of managing foreign currency exposure: discussion of hedging approaches involving physical markets.

**Week 9: Forecasting the exchange rate**
Discusses techniques for predicting the future path of the exchange rate. The relative merits of econometric models versus other approaches to forecasting currency movements.
**Week 10: International funding**
Looks at arguments for and against raising finance globally, both short and long term. Various types of international financial instrument and their advantages. Defining the ‘international cost of capital’.

**Week 11: International investing**
Deals with decisions relating to making foreign investment, both ‘portfolio’ and ‘direct’. Benefits of global portfolio diversification. International CAPM model. Alternative theories to explain foreign investment.

**Week 12: International taxation**
The impact of taxation, including the impact of differential capital income and withholding tax regimes, on offshore financing and investing decisions.

**Week 13: International banking**
The Eurocurrency market. Cross-border banking activities. International monetary system and alternative exchange rate regimes.

**FINAL MARK (out of 30)**

Marker’s comment:
PLAGIARISM DECLARATION

Plagiarism involves using the work of another person and presenting it as one’s own. Any of the following acts constitutes plagiarism unless the source of each piece of borrowed material is clearly acknowledged:

(a) copying out part(s) of any document or audiovisual material, including computer or web based material

(b) using or extracting another person’s concepts, computations, experimental results or conclusions

(c) summarising another person’s work

(d) submitting substantially the same wording, results or material as another student.

Encouraging or assisting another person to commit plagiarism is also an improper form of academic conduct and may attract the same penalties as plagiarism.

STATEMENT TO BE SIGNED BY STUDENT:

1. I have read the description of plagiarism above

2. In my assignment I have carefully acknowledged the source of any material which is not my own work

3. I am aware that plagiarism can attract severe academic penalties
