

MACQUARIE  
UNIVERSITY

FACULTY OF  
BUSINESS AND ECONOMICS

---

**MKTG 809**

**Marketing Logistics**

**Lecturer: Gareth Jude**

**Semester 1,**

**Year 2009**

**MACQUARIE UNIVERSITY  
FACULTY OF BUSINESS AND ECONOMICS  
UNIT OUTLINE**

**Year and Semester: 2009 Semester 1**

**Unit convenor: Gareth Jude**

Students in this unit should read this unit outline carefully at the start of semester. It contains important information about the unit. If anything in it is unclear, please consult one of the teaching staff in the unit.

**ABOUT THIS UNIT**

Marketing and logistics would seem on the surface to be natural enemies but in the modern business world logistics have ceased to be simply the study of the most efficient way of moving goods from A to B and have become a key source of competitive advantage and essential element of the marketing mix.

The objective of this unit is to increase the understanding of the important issues in planning and evaluating logistics strategies across consumer and industrial markets and across goods and services. The unit will introduce appropriate theories, models and other tools needed to make better logistics decisions. A strong marketing orientation is carried throughout the course. Particular emphasis is placed on understanding marketing channel principles as well as how the building blocks of logistics serve the marketing function...

**The specific basic objectives of the unit are:**

1. To increase understanding of the important issues in planning and evaluating marketing logistics strategies;
2. To provide the appropriate theories, models, and other tools to make better logistics decisions; and
3. To provide a forum for students to apply these principles.

**Credit points**

This is a single semester (half-year) 4-credit point unit. The number of credit points that a unit is worth is determined by the number of hours that a student is expected to spend each week attending lectures, reading and preparing assignments. For a single semester unit, students are expected to spend 4 hours per credit point each week on work related to the unit. Students are strongly advised to prepare their study timetable accordingly.

- Unit description and credit points (unit description to be consistent with description in handbook)
- Unit rationale (why it is significant & any relevant relationship to other units in the program)

## TEACHING STAFF

Covener: Gareth Jude  
E-mail: [gjude@ozemail.com.au](mailto:gjude@ozemail.com.au)

Consultation Thursdays 5pm-6pm by appointment

## CLASSES

- There will be 12 x 3 hour lectures as well as a final exam
- The timetable for classes can be found on the University web site at:  
<http://www.timetables.mq.edu.au/>

## REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS

### Required Textbook

There is no required textbook for this course

### Recommended Texts

Coughlan, A. T.; Anderson, E.; Stern, L. W.; and, El-Ansary, A. I. (2006) *Marketing Channels* 7<sup>th</sup> edition, Prentice-Hall, New Jersey.

Ballou, R. H. (2004), *Business Logistics Management* 5<sup>th</sup> Ed, Prentice Hall, New Jersey.

Simchi-Levi, D., Kaminsky, P. and Simchi-Levi, E. (2008), *Designing & Managing the Supply Chain: concepts, strategies and case studies*, 3<sup>rd</sup> Ed, McGraw-Hill/Irwin, New York

These three texts will be referenced heavily during the course. Copies are available in the library and will be placed on closed reserve

### Other Relevant Texts

Christopher, M. (2003), *Logistics and Supply Chain Management* 3<sup>rd</sup> ed. Financial Times, Prentice Hall, Harlow

Lambert, D. M. and Stock, J. R. (2001), *Strategic Logistics Management* 4<sup>th</sup> Ed, Irwin, Chicago.

Murphy Jr., P. R. and Wood, D. F (2008), *Contemporary Logistics*, 9<sup>th</sup> Ed, Pearson Prentice-Hall, Upper Saddle River, N. J.

Pelton, L. E., Strutton, D., and Lumpkin, J. R. (2002), *Marketing Channels: A relationship management approach*, 2<sup>nd</sup> Ed, Irwin/McGraw Hill, Boston.

### Journals and Business Periodicals

These publications contain extra information on the subject and may be of use to students

Logistics Management

Journal of Marketing Channels

International Journal of Retail and Distribution Management

## UNIT WEB PAGE

Blackboard - <https://learn.mq.edu.au>

## LEARNING OBJECTIVES AND OUTCOMES

The learning outcomes of the unit are

- To understand the relationship between Marketing and a Logistics system.
- To gain an understanding of the major issues involved in managing Marketing Logistics
- To be able to apply Marketing Logistics theory to real life examples.
- To be able to critically assess Marketing Logistics strategy
- To work effectively in groups to analyse and prepare reports on Marketing Logistics management issues

In addition to the discipline-based learning objectives, all academic programs at Macquarie seek to develop students' generic skills in a range of areas. One of the aims of this unit is that students develop their skills in the following:

- Foundation skills of literacy, numeracy and information technology;
- Self-awareness and interpersonal skills;
- Communication skills;
- Critical analysis skills;
- Problem-solving skills;
- Creative thinking skills.

Students with writing problems will find that help can be found at:

[http://www.ling.mq.edu.au/support/writing\\_skills/letter.htm](http://www.ling.mq.edu.au/support/writing_skills/letter.htm)

## TEACHING AND LEARNING STRATEGY

The unit is taught through lectures and student group presentations

### a. Lectures

Students should prepare for each lecture by, as a minimum,

- reading the nominated chapters from the recommended texts
- reading the nominated case studies/papers
- reading relevant material from the recommended reading lists.

Lectures are your opportunity to assess whether or not you fully understand the topic of the week and to debate your opinions with the class.

### **b. Group Presentations**

Logistics problems are by their nature multi-disciplinary therefore in the business world you can expect to have to work with groups of other managers to resolve logistics issues. Working in groups during this course will be valuable experience for your working life ahead.

Each group will be required to give two presentations during the course i.e. one case study and a logistics audit

## **RELATIONSHIP BETWEEN ASSESSMENT AND LEARNING OUTCOMES**

### **a. Individual Research Topic**

**15%**

In week two you will be given a research topic to complete. The research topic will relate to material presented in weeks one to three of the course and be designed to test your understanding of channel design principles and your ability to individually research the logistics literature. This report is to be no longer than 2000 words excluding references and appendices. The report should be handed in before the start of the class in week four. This task is an early diagnostic for the lecturer to test your comfort with the course material and your ability to present a written report.

### **b. Group Presentations**

**35% (comprising**

**case/paper presentation 10%, logistics audit 25%)**

Each group task consists of a presentation to the class and a written report. The group presentations are designed to test your ability to communicate analysis of business issues both verbally and in writing. You will be graded on

- i) the quality of your presentation to the class
- ii) the quality of your analysis and recommendations
- iii) your ability to apply the analytic concepts from class to your allocated operational problem.
- iv) Depth of research conducted on the assignment

Written reports are to be typed in a 12-point font, double-spaced with 2.0 cm margins on one side of page only. Failure to do this will result in no written comments on your assignment. Assignments are to be submitted with a group cover sheet (see below). Staple your assignment in the top left-hand corner. Do not put the report in a binder or individual pages in separate plastic holders - you will not get the binder or plastic sleeve back and they may not be marked or you may not get comments on your assignment.

Submissions that go beyond the page limit will not be marked as to do so would give non-complying groups an unfair advantage

Reports should be handed in at the commencement of the lecture in which the presentation is to be made. Late reports will be penalized at the rate of 20% of the available marks per day late. No

assignment will be accepted after one week after the due date, that is, you will receive a Fail grade for the assignment. Assignments will be returned two weeks after the due date.

All assignments must be referenced using the Harvard (author, date) method. Failure to follow this method will result in marks being deducted. Using footnotes or endnotes will also incur a loss of marks.

It is the group's responsibility to keep a copy of the presentation and report.

i. **Case /paper presentation (10%)**

Analysis of business problems then preparing concise reports and recommendations for action to management will be a regular feature of your business career. Case study/ Paper analysis simulates this business activity.

You should use the following structure for each case study /paper analysis:

Situation Analysis

Perform a SWOT analysis i.e. Strengths and weaknesses of the company; opportunities and threats in its external environment. Substantiate any assertions being made with evidence from the case i.e. if sales are going up say by how much, if there is conflict in the channel say who is it between.

Problem Definition

Define the main issues or real problems facing the company and lay these out, where relevant, as one or more principal logistical problems.

Analysis and Evaluation of Options

Analyse the problems facing the company by extrapolating the facts and figures from the case. It is important in this section to take the numbers given in the case a little further than they are presented.

After completing this analysis evaluate the pros and cons of the most feasible alternatives considering costs and benefits of each.

Other Information that should be Obtained

each case/paper studies a business problem with limited information. Specify the further data you think should be obtained and the analysis required give a better solution to the case/paper problem.

Recommended Courses of Action

Make recommendations giving reasons.

**General notes**

- The first case study lecture (week 2) lecture will be a model of how to prepare your answer

- At all times limit your analysis to the facts available in the case. No external data is to be introduced. Occasionally you will, like any manager, need to make assumptions. Please note any assumptions you have made.
- All case study material can be used in the final exam as supporting evidence for your answers

The cases/papers will be available two weeks before the relevant lecture on the Blackboard or distributed in hard copy in class. Each class presentation should be around twenty minutes in duration and be supported by whatever audio visual aids you require to illustrate your arguments. Be prepared to hand soft copy of your presentation to the lecturer at the end of the presentation. A three to four page written report, which needs to be handed in before the commencement of the relevant lecture, should accompany your presentation.

## ii Marketing Logistics Audit (35%)

You will be required to perform an audit of a specific firm's existing logistics system. Your report should be presented in three parts

1. Describing the **current state** of the marketing logistics system. What are the key service outputs, its distribution channels, information systems, stock holding, storage network, transport arrangements etc.)
2. **Suggestions for improvement** of the marketing logistics system and management.
3. An **annotated bibliography** to any secondary sources you use (business press articles, journals, books, etc.) Each reference in the bibliography should be accompanied by several sentences explaining the major points of the reference and their relevance to your group's research. Under **no** circumstances simply copy the abstract of the article. You must use your own words. There is no page limit for the annotated bibliography, however, it should only include **relevant** articles and texts. In addition you should mention the names, titles, and companies of any people you interview for the audit

You are responsible for finding a firm whose marketing logistics system you wish to study. You should do your best to use both primary (e.g., personal interview) and secondary (e.g., library research) data to perform your analyses *although it is not compulsory to do primary research.*

You will be introduced to templates and analytic tools over the first half of the course that will equip you to do this real-world analysis.

Projects submitted by individuals will not be marked.

It is best to study a pre-existing marketing logistics system rather than a firm's plans to enter a new market and build up a new system. However, if you wish to look at a case of new market entry, you may do so, but please include an analysis of the firm's pre-existing marketing logistics system (if it exists) for other products and suggestions for altering it for the new product or market.

All groups will present their marketing logistics audit in week 12. Each class presentation should be a maximum of fifteen minutes in duration and be supported by whatever audio visual aids you require to illustrate your arguments.

The report itself (excluding the annotated bibliography and exhibits) should be no more than 3000 words long. Submissions that go beyond the word limit will not be marked as to do so would give non-complying groups an unfair advantage.

It is our experience that students find it no challenge to fill up the word limit. Do not waste it on irrelevant information and verbosity. If history repeats then what will separate the better assignments from the others will be the level of understanding of the theory and competence in applying it to the issues.

### **Group Formation**

Your group should consist of **four** students. Students have two options for joining a group.

#### Option 1 – Organise your own group

Students can organise themselves into groups of four. This option has the benefit of enabling students to select whom they will work with. Students taking this option must submit a completed Group Contact Sheet (one per group, with the contact details of all group members) in the week two lecture. A blank Group Contact Sheet is included at the end of this unit outline.

#### Option 2 – Be placed in a group by the lecturer.

Students who have not organised themselves into a group, or have organised a group of less than five, will be formed into groups of five by the lecturer. In this case students must submit a group contact sheet containing their name(s), contact details etc. in the week two lecture. Contact details for the groups allocated by the lecturers will be available in the week three lecture.

As you will have to be in regular contact with your group it is recommended that you get the contact details of all of the members in your group. A blank Group Contact Sheet is included at the end of this unit outline for that purpose. Not being in contact with your group is not an excuse for having little input into the group work.

If you do not pursue either option 1 or option 2 it will be assumed that you are not continuing with the unit.

### **Marking and Peer Assessment**

Working in groups is a valuable experience for students in that it reflects working life, however, it presents some difficulties for markers. In particular, the marker is not present at any of the group meetings, and so does not see the contributions of the individual members. The marker will mark the project, but will rely on information from each group to generate individual marks.

To provide an assessment of each group member's contribution to the assignment the group members are to agree on the contribution made by each member and sign off on their decision. This information is to be included on the assignment cover sheet. An assignment cover sheet is provided at the end of this outline.

If the group considers that all members have contributed equally, then each member will put 100% as their contribution and all members will be given the same grade as the marker gives the written assignment. If, for example, the group considers that one person has contributed significantly more than the others then that person will put down 100% as their contribution, and the others will put down something less than 100%. Another example would be where the group agrees that one member has

done significantly less than the others, in this case that person would put down something less than 100% as their contribution.

The marker will give a mark for the assignment. This mark will then be multiplied by the contribution % for each member of the group to arrive at an individual mark for each student. So, if a student has a contribution of 100%, and a group project mark of 75, then the student will be given an individual mark of 75 ( $75 \times 100\%$ ). If, however, a student has a contribution of 90%, and a group project mark of 75, then the student will be given an individual mark of 67.5 ( $75 \times 90\%$ ). 100% is the highest that can be given.

When assessing each member's contribution it is important to take a balanced view, recognising that there are various roles, skills and stages involved in the project. The project will involve information gathering, familiarisation with theory, synthesis of ideas, analysis of information, writing of the project report and finally word processing the project report. When working in groups it is usual for people to take on various roles (leader, scribe, idea generator, etc). While some roles are more visible than others none is any more important than the others. Unless all are done well, the result will be flawed. It is up to the group to negotiate amongst itself how the work will be allocated in an equitable manner, making the best use of people's strengths.

There are three things that you should give weight to when assessing group members contributions, firstly their attendance at group meetings, secondly their punctual delivery of the work that the group has assigned them, and thirdly whether or not their contribution to discussions are based on the theory.

### **c. Final Examination**

**50%**

The final exam will be held in the lecture in week 13 and be worth 50% of the course marks. Students must achieve a pass in the final exam to achieve a pass for the course.

The examination will be "closed book". It will consist of a case study, short answer and essay questions and be designed to fully test your understanding and ability to express your understanding of all of the course material. Further details will be given later in the semester regarding format and content including some sample questions.

The only exception to not sitting the examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to consider applying for Special Consideration. Information about unavoidable disruption and the special consideration process is available at <http://www.reg.mq.edu.au/Forms/APSCon.pdf>

You are advised that it is Macquarie University policy not to set early examinations for individuals or groups of students. All students are expected to ensure that they are available until the end of the teaching semester, that is the final day of the official examination period.

## **PLAGIARISM**

The University defines plagiarism in its rules: "Plagiarism involves using the work of another person and presenting it as one's own." Plagiarism is a serious breach of the University's rules and carries significant penalties. You must read the University's practices and procedures on plagiarism. These can

be found in the *Handbook of Undergraduate Studies* or on the web at:  
<http://www.student.mq.edu.au/plagiarism/>

The policies and procedures explain what plagiarism is, how to avoid it, the procedures that will be taken in cases of suspected plagiarism, and the penalties if you are found guilty. Penalties may include a deduction of marks, failure in the unit, and/or referral to the University Discipline Committee.

#### **DETERMINATION OF OVERALL GRADE**

The marks for each assessment task will be combined to determine a final mark for the course. Academic Senate has a set of guidelines on the distribution of grades across the range from fail to high distinction. Your final result will include one of these grades plus a standardised numerical grade (SNG).

On occasion your raw mark for a unit (i.e., the total of your marks for each assessment item) may not be the same as the SNG which you receive. Under the Senate guidelines, results may be scaled to ensure that there is a degree of comparability across the university, so that units with the same past performances of their students should achieve similar results.

It is important that you realise that the policy does not require that a minimum number of students are to be failed in any unit.

The process of scaling does not change the order of marks among students. A student who receives a higher raw mark than another will also receive a higher final scaled mark. An explanation of the way in which the results achieved in the individual assessment tasks are combined to give an overall grade.

#### **STUDENT SUPPORT SERVICES**

Macquarie University provides a range of Academic Student Support Services. Details of these services can be accessed at <http://www.student.mq.edu.au>.

<b>Date</b>	<b>Session</b>	<b>Topic</b>	<b>Comments</b>
