ACST 307 / 817 Quantitative Asset and Liability Modelling 2

SECOND SEMESTER 2011

Unit convenor: Jiwook Jang
Prerequisites: ACST202(P) and STAT272(P). Please consult the Unit Convenor if you do not meet any of the prerequisite requirements for the unit.

Credit points: 3 (ACST307) and 4 (ACST817)

Students in this unit should read this unit outline carefully at the start of semester. It contains important information about the unit. If anything in it is unclear, please consult the unit convenor.

ABOUT THIS UNIT

The topics covered include: an introduction to stochastic processes; martingales; an introduction to stochastic calculus; Ito's lemma; binomial lattice option pricing models; arbitrage-free pricing via replicating portfolio and risk neutral probability measures; the Black-Scholes option pricing model; the Girsanov theorem; the Greeks and dynamic hedging; American and exotic option pricing; pricing non-defaultable zero-coupon bond using short and forward interest rate models; pricing defaultable zero-coupon bond based on firm-value and default intensity.

TEACHING STAFF

The staff involved in the teaching of this unit are

<table>

</tbody>
</table>

Celeste Chai is a teaching administrator for this unit, who is responsible for all the administrative aspects of the unit. Administrative questions that are not covered in this unit outline should be directed to her on the Private Mail facility of the website. If the questions are of interest to everyone in the unit, the question and the reply will be posted to the Discussion Board, so you should specifically request if you want your message to remain private.
Questions about unit content should be sent to the Discussion Board of the website or raised during tutorials or lectures.

**CLASSES**

This unit will consist of 2 hours of lectures and 1 hour tutorial per week. Lectures are held at the following times:

<table>
<thead>
<tr>
<th>Day</th>
<th>Time</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thursday</td>
<td>4:00 pm – 6:00 pm</td>
<td>E7B T2</td>
</tr>
</tbody>
</table>

ACST 307 Tutorials are held at the following times, commencing in week 2:

<table>
<thead>
<tr>
<th>Day</th>
<th>Time</th>
<th>Location</th>
<th>Tutor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thursday</td>
<td>6:00 pm – 7:00 am</td>
<td>F9C 113</td>
<td>Celeste Chai</td>
</tr>
<tr>
<td>Friday</td>
<td>2:00 pm – 3:00 pm</td>
<td>C5A 401</td>
<td>Jacqueline (Yixin) Xu</td>
</tr>
<tr>
<td>Friday</td>
<td>3:00 pm – 4:00 pm</td>
<td>C4A 312</td>
<td>Jacqueline (Yixin) Xu</td>
</tr>
</tbody>
</table>

ACST 817 Tutorial is held at the following time, commencing in week 2:

<table>
<thead>
<tr>
<th>Day</th>
<th>Time</th>
<th>Location</th>
<th>Tutor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Friday</td>
<td>1:00 pm – 2:00 pm</td>
<td>C4A 325</td>
<td>Jiwook Jang</td>
</tr>
</tbody>
</table>

You must attend the tutorial class in which you are enrolled. The tutorial is an opportunity for you to attempt the section exercises given at the end of each section of work, and to discuss problems with the tutor.

There is no tutorial held during Week 1.

Any alterations to the class times or locations will be advised in lectures and via the website.

**CONSULTATION HOURS**

There will be no consultation hours as questions about unit content should be initially posted on the Discussion Board of the website.

If face-to-face consultations for academic queries are required, students should contact to the unit convenor via the Macquarie University e-mail system to make an appointment.

**REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS**

The recommended textbooks for this course are:
The textbook by Hull includes many worked examples and exercises. You may wish to buy a copy of the Solutions Manual. Each copy of these books is available in the Reserve section of the Library.

Lecture notes can also be found from the ActEd Study Materials (subject CT8). You can purchase these notes via ASSOC at a discounted price. Information about their availability and price will be confirmed on Blackboard and in the lectures.

The advanced textbooks for this course are:

<table>
<thead>
<tr>
<th>Title</th>
<th>Author</th>

UNIT WEB PAGE

To access the website, go to http://learn.mq.edu.au and login using your usual login and password. You will then have access to the websites for all the units in which you are enrolled. If you have any trouble logging in (e.g. you have forgotten your password), please contact the Student IT Helpdesk.

Before logging in, you should follow the link labelled “Technical Information” and read all the information there, including the Information Technology Security Policy and Rules and the Information Technology Usage Rules. This technical information also mentions a number of “plugins” that may be required. Of those listed, in this unit you will only need Acrobat Reader.
The web site will be used as an integral part of this unit. The website for this unit contains:

- **Course content:**
  - **Unit outline.** A copy of this unit outline.
  - **Lecture notes.**
  - **Weekly exercises with solutions.**
  - **Tests and exams.** Past class tests and exams with solutions.
  - **Links.** Any web links you need to use will be made available here.

- **Discussions.** A Discussions board to discuss problems with your fellow students.
- **Mail.** To contact the teaching administrator and for the teaching administrator to contact you.

It is your responsibility to check the website regularly to make sure that you are up-to-date with announcements and with messages sent to your Mail address.

Remember to close your browser when you have finished using the site. If you don't, another person can use the still running browser to access the website with your account.

**LEARNING OBJECTIVES AND OUTCOMES**

This unit aims to introduce students to Brownian motions, stochastic calculus, derivatives pricing, interest rate models and credit risk models. You should review lecture notes in advance of each lecture and after completing each section of work.

On completion of this unit, students should be able to do the following:

1. Understanding of random walk, Brownian motions, martingale, stochastic calculus and Ito’s lemma.

2. Understanding of arbitrage-free pricing via replicating portfolio and risk neutral probability measures.

3. Pricing option via the Black-Scholes option pricing model (continuous time model) where replicating portfolio and the Girsanov theorem are used to achieve no-arbitrage.

4. Hedging portfolio via the Greeks.

5. Pricing American and exotic options via Binomial lattice option pricing model.

6. Pricing non-defaultable zero-coupon bond using short and forward interest rate models.
7. Defaultable zero-coupon bond pricing based on firm-value and default intensity.

In addition to the discipline-based learning objectives, all academic programs at Macquarie seek to develop students’ generic skills in a range of areas. One of the aims of this unit is that students develop their skills in the following: *Critical analysis skills; Problem-solving skills; Creative thinking skills.*

**TEACHING AND LEARNING STRATEGY**

The unit material is covered in the four hours of lectures each week. The tutorial is an opportunity for you to attempt questions for each section of work, or to ask questions. In addition to the tutorial, you should use the Discussion Board to ask questions or discuss concepts covered in the unit.

This unit is assessed using two class tests and a final examination. The following table gives an indication of the relative weighting of the assessment components:

<table>
<thead>
<tr>
<th>Assessment Component</th>
<th>Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mid-Semester Test 1 (Cover topics up to Week 6)</td>
<td>15%</td>
</tr>
<tr>
<td>Mid-Semester Test 2 (Cover topics up to Week 10)</td>
<td>15%</td>
</tr>
<tr>
<td>Final Examination (Cover all topics)</td>
<td>70%</td>
</tr>
</tbody>
</table>

The assessment structure is suitable given the problem-solving and technical nature of the unit, and is also aimed at encouraging you to regularly review the material. An assessment schedule is given below and any changes to the assessment or assessment due dates will be advised in classes/on website.

In addition to tasks that count for assessment, you will be provided with Lecture Examples and Tutorial Exercises to attempt before the tutorials. Lecture Examples and Tutorial Exercises solutions are available on the website after lectures/tutorials. Lecture Examples and Tutorial Exercises are aimed at helping you to understand the fundamental concepts before moving on to more difficult material. They are also aimed at developing your understanding of the unit material so that you are able to successfully complete the assessable tasks.

Past class tests and examinations with full solutions are available from the website, and give you a good source of practice questions that are of examination difficulty.

**Mid-Semester Tests**

There will be two class tests, each worth 15% of the final assessment for the unit. You will be allowed to take one A4 page into the exam (handwritten or typed and filled in on one or two sides).

- Test 1 will be held **Thursday 15 September** at 4 pm. It will cover topics up to Week 6.
- Test 2 will be held **Thursday 27 October** at 4 pm. It will cover topics up to Week 10.

Please note that coverage may be subject to change and that any alterations will be advised in lectures/on Blackboard.

The format of the mid-semester test will be a written paper consisting of 3 or 4 questions. You will answer in the spaces provided on the test paper, although a writing booklet will be distributed to you for scribbling (which is NOT collected or marked). All answers must be written in black or blue pen or a pencil (do NOT use a red pen).

When the test is marked, you will be notified to collect them from BESS (E4B106). Class feedback and a marking guide will be provided on the website. It is hoped that marked papers will be returned within 12 working days of the class test date.
You should contact the unit convenor immediately (eg. prior to the test) if unexpected ill-health or other disruption affects your preparation for or performance in a class test. Applications for special consideration due to documented illness or unavoidable disruption must then be made on the “Special Consideration” form, available at http://www.registrar.mq.edu.au/Forms/APScons.pdf, and submitted to the unit convenor.

Exam

The final examination (3 hours with 10 minutes reading time) is worth 70% of the final assessment for the unit. The examination will cover the entire course. You will be allowed to take one A4 page into the exam (handwritten or typed and filled in on one or two sides).

The University Examination period in Second Half Year 2011 is from 14 November to 2 December.

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations. http://www.timetables.mq.edu.au/exam

The only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to consider applying for Special Consideration. The University’s policy on special consideration process is available at http://www.mq.edu.au/policy/docs/special_consideration/policy.html

If a Supplementary Examination is granted as a result of the Special Consideration process the examination will be scheduled after the conclusion of the official examination period. (Individual Faculties may wish to signal when the Faculties’ Supplementary Exams are normally scheduled.)

The Macquarie university examination policy details the principles and conduct of examinations at the University. The policy is available at: http://www.mq.edu.au/policy/docs/examination/policy.htm

SPECIAL CONSIDERATION FOR EXAM

The University is committed to equity and fairness in all aspects of its learning and teaching. In stating this commitment, the University recognises that there may be circumstances where a student is prevented by unavoidable disruption from performing in accordance with their ability. A special consideration policy exists to support students who experience serious and unavoidable disruption such that they do not reach their usual demonstrated performance level. The policy and procedure are available at:

http://www.mq.edu.au/policy/docs/special_consideration/policy.html
http://www.mq.edu.au/policy/docs/special_consideration/procedure.html
**RULES REGARDING TESTS AND EXAMINATIONS**

Normal examination rules apply to the conduct of test and the final examination. These rules are set out under the heading “Conduct of Examinations” in the Student Information – Assessment section of the current Macquarie University Handbook of Undergraduate Studies. Students are responsible for familiarising themselves with these rules prior to the class test and the final examination.

You should ensure that your handwriting in the class test and in the final examination is legible. Sections of work that are not legible will not be marked.

Academic Senate has resolved that no mobile phones should be brought into examination rooms. Mobile phones must be switched off and sealed in closed bags during class tests.

Calculators will be allowed in the class test and the final examination but a clear indication of the steps involved in every calculation must be shown. Any machines that have a text-retrieval capacity, whether or not they have a full alphabet on the keyboard, are not allowed. Calculators may be checked at the commencement of class test and final exam, and the make/model may be recorded.

Dictionaries will **not** be permitted in the class test or the final examination.

**PLAGIARISM**

The University defines plagiarism in its rules: "Plagiarism involves using the work of another person and presenting it as one's own." Plagiarism is a serious breach of the University's rules and carries significant penalties. You must read the University's practices and procedures on plagiarism. These can be found in the *Handbook of Undergraduate Studies* or on the web at: [http://www.student.mq.edu.au/plagiarism](http://www.student.mq.edu.au/plagiarism)

The policies and procedures explain what plagiarism is, how to avoid it, the procedures that will be taken in cases of suspected plagiarism, and the penalties if you are found guilty. Penalties may include a deduction of marks, failure in the unit, and/or referral to the University Discipline Committee.

**UNIVERSITY POLICY ON GRADING**

Macquarie University uses the grades HD (High Distinction), D (Distinction), CR (Credit), P (Pass), and F (Fail) for grading the achievements of students in units of study. Grade descriptions and other information is in the Macquarie University Grading Policy which is available at:

**GRADING APPEALS AND FINAL EXAMINATION SCRIPT VIEWING**

If, at the conclusion of the unit, you have performed below expectations, and are considering lodging an appeal of grade and/or viewing your final exam script please...
refer to the following website which provides information about these processes and the cut off dates in the first instance. Please read the instructions provided concerning what constitutes a valid grounds for appeal before appealing your grade.

http://www.businessandeconomics.mq.edu.au/for/new_and_current_students/undergraduate/admin_central/grade_appeals

There will be a very limited time to make this request, and this must be done through the formal process rather than by a request to the unit convenor.

Please note that all marks will not be recorded on exam scripts in this unit. Instead, marks and marker notes / comments are recorded in detailed spreadsheets (which are not provided to individual students). **You will not, therefore, gain access to your raw marks by viewing your exam scripts.** The purpose of viewing your exam script is to compare your answers with the sample solutions for the purpose of identifying where you showed a lack of understanding.

**STUDENT SUPPORT SERVICES**

**BESS.** Business and Economics Student Services (BESS) is located in room E4B106. Information about facilities and services is at:

http://businessandeconomics.mq.edu.au/for/new_and_current_students/undergraduate/bess

In this unit, class tests will be returned via BESS.

**Consultation room.** Consultation sessions with tutors will be held in the FBE Consultation Room E4B 104. The consultation times will be confirmed on Blackboard and in the lectures.

**ACSTINFO.** This ACSTINFO site is used to distribute information to all students majoring in actuarial studies. The information supplied may include administrative information and job advertisements. You will retain access to this site during the vacation following the end of this semester. It is to your advantage to ensure you read information on this web site regularly. You should not assume that information posted there will also be repeated in lectures. To access the site, login at: http://learn.mq.edu.au/ and the site should appear among your list of units. When you first login, please read the section labelled “How to use this site.” This contains useful information which will help you determine when there is new information on the site which you should read.

**IT CONDITIONS OF USE**

Access to all student computing facilities within the Faculty of Business and Economics is restricted to authorised coursework for approved units. Student ID cards must be displayed in the locations provided at all times.

Students are expected to act responsibly when utilising University IT facilities. The following regulations apply to the use of computing facilities and online services:
- Accessing inappropriate web sites or downloading inappropriate material is not permitted. Material that is not related to coursework for approved unit is deemed inappropriate.
- Downloading copyright material without permission from the copyright owner is illegal, and strictly prohibited. Students detected undertaking such activities will face disciplinary action, which may result in criminal proceedings.

Non-compliance with these conditions may result in disciplinary action without further notice.

Students must use their Macquarie University email addresses to communicate with staff as it is University policy that the University issued email account is used for official University communication.

**EXEMPTIONS**

The units ACST307/817 and ACST306/816 together correspond to the professional subject CT8. The exemption will be recommended if and only if a SNG of at least 60 is achieved in both units and the average SNG is at least 65.

**INSTITUTE OF ACTUARIES OF AUSTRALIA**

The Institute of Actuaries of Australia (IAAust) has recently launched a new free offer for students to become IAAust University Subscribers. Full time undergraduates studying at an Institute accredited university who are members of a university student actuarial society are eligible. To sign up, go to http://www.actuaries.asn.au/Membership/MembershipoftheInstitute/Subscriber.aspx.

The University Subscriber offer is not a membership of the IAAust but a subscription to receive information on career opportunities, invitations to selected IAAust events and online publications. You might also consider joining the IAAust – there are advantages in doing so while a full-time student. For membership information, go to http://www.actuaries.asn.au/Membership/MembershipoftheInstitute.aspx.

**CLASS ETIQUETTE**

Mobile phones should be switched off during all lectures and tutorials. If there is an important reason for you to keep your phone on you should request to be allowed to do so before the start of the class.

Lectures commence at 5 minutes past the hour and you are expected to be punctual. You are expected to keep talking to a minimum so as not to disrupt your fellow students (and the lecturer!).

**ELECTRONIC COMMUNICATION AND YOUR STUDENT FILE**

Every business keeps a record of its correspondence with its customers. The University is no exception and it maintains a file for every student. Staff are required
to ensure that copies of all correspondence with you are added to your file. Historically, “correspondence” meant letters, but nowadays it also includes electronic communication such as email. Staff have some discretion here and might not file copies of trivial emails, but it is difficult to define precise boundaries here, so it is safer to assume that any email you send to a staff member will be added to your file.

Some people regard email as more ephemeral than a letter and thus tend to take less care with issues such as clarity of expression, grammar and spelling. Before sending an email to a staff member, a good question to ask yourself is: “If a member of staff is reviewing my student file prior to writing a reference for me, and they see a copy of this email, would that staff member gain a favourable impression of my level of communication skills?”

In this context, email includes communications you send to staff with the mail tool in the unit’s web site. It does not normally include postings you make to the discussion area. However, in those very rare cases where a student makes an inappropriate posting to the discussion area, a copy of the posting would be added to that student’s file.

FEEDBACK

I would welcome your feedback on any aspect of the unit.

If you see that something could be improved, let me know your ideas and if I agree that your ideas are good I will make changes. You can give me feedback in lectures or by posting to the website (anonymously if need be).

I hope not to see any feedback in the end-of-semester unit evaluations that I haven’t heard about already and therefore had the opportunity to respond to. Please get involved in making this unit as useful and rewarding as possible.

Jiwook Jang
