ABOUT THIS UNIT

This unit is aimed at teaching students knowledge and skills concerning the strategic management of people at work. Much of the content will be immediately applicable to real organisations. The unit covers four major areas:

- Theory; developing, reviewing and appraising perspectives on strategic HRM
- Practice; looking at real cases to see how organisations have attempted to implement strategic HR programs.
- Theory-practice linkages; identifying the application of theory in case organisations – what has worked/not worked; how explicit theoretical perspectives are used to drive organisation programs; how broader theory identifies common patterns in organisation HR practice
- Critical and reflective; developing the intellectual perspective and tools for students to evaluate various approaches to problem solving in key areas of the HRM field, and determining their own perspectives

LEARNING OBJECTIVES, OUTCOMES, AND GRADUATE CAPABILITIES

After completing this unit, students will have the capability to:

1. Understand the importance of thinking strategically about appropriate systems and methods for managing people effectively at work
2. Identify key strategic areas of HR practice and their potential contribution to the success of the organisation

3. Understand the role and consequences of using alternative techniques and practices in these key areas
4. Be familiar with an organisation's accountabilities in different areas of HR
5. Think critically about the usefulness of various HR practices and how they might improve the effectiveness of HR in organisations that they work for
6. Be an informed and critical consumer of HR products (eg Consultancy services)

On completion of this unit students will be able to evaluate the utility of contemporary theoretical perspectives on strategic human resource management and apply this knowledge to real organisations. As part of the unit students will be required to assess contemporary HR practice in real case organisation to understand how they have implemented various strategic HR programs.

The learning outcomes require students to identify theory-practice linkages; assess the application of theory to differing case organisational circumstances and practices; analyse and quantify organisational outcomes using different measurement techniques; critically reflect on their own people management skills; develop their own intellectual perspective to the course material; and become familiar with key tools and alternative approaches to problem solving in the main sub-areas of the HRM field.

TEACHING AND LEARNING STRATEGY AND ACTIVITIES

Students are expected to read and research each topic in advance, participate in class and tutorial discussions and to maintain a strong interest in current issues and changes in HRM. Material on case organisations can be found regularly in newspapers such as the Sydney Morning Herald, The Australian and The Australian Financial Review and magazines such as BRW.

STUDENT WORKLOAD

According to Academic Senate Guidelines, student workload should be three hours per credit point per week, including the two week semester break. This means a three credit point unit should have a student work load of 135 hours.

DETAILS OF ASSESSMENT TASKS

Assessment #1: Individual, early semester test, worth: 20%, week 4

To gain an early assessment of your understanding of the subject materials, a one hour mid semester test will be held during the tutorial times in Week 4. There will not be a supplementary test – any student who misses this test will need to provide a medical certificate or other documentation. The test will consist of short answer questions on the course content for weeks 1-4. Marks and feedback will be given to students in class, two weeks after the exam.

Assessment #2: Group assessment 30% - Case Company review and Presentation

Aim: Each student group will be allocated a case company to research intensively during the course.

The case companies are well known ASX listed companies. Groups will be formed and case allocated during week 1 class. Each group will become a company expert. The group will develop a major report on the HR profile, practices, policies, responsibilities, strategic contribution and challenges relating to the topic under discussion for the corresponding week. In researching this report students should draw on the company annual report as well as other reports (eg sustainability, CSR or OHS or other relevant reports). In addition newspaper and other press articles and any other independent reports can be used to build the company profile. We will also discuss in class the possibility of approaching the company directly although this should not be done before discussion with the LIC.

Students' research, communication, analytical, integrative and critical thinking skills will be developed by this presentations and report. Further briefing on this activity and specific assignments will be given as the course progresses.

As a minimum the report should:

- identify the intended purpose of the particular strategy/policy and the HR techniques which follow from them.
- explain the rationale for the strategy/policy
- explain (where appropriate) the way that the strategy/policy is influenced by internal (organisational) and external (environmental) factors.
- evaluate the extent to which the HRM strategy/policy and related techniques contribute to organisational performance
- connect to the ideas in the course via the academic literature

Hand in Report (25%): The maximum report length is 3000 words, excluding references. Include the word count at the end of report.

Due date: The report is to be handed in one week after presentation. Submissions will have 2% deducted per day late, including weekend days. **Late assignments** should be submitted to BESS in building E4B to be date stamped and forwarded to your LIC for marking. Note, electronic assignments will NOT be marked.

Presentation Component (5%): As well as the report the group is required to present an overview of the case company/issue (refer case schedule and allocations from week 1) to share their findings with the rest of the class. This should take the form of a ten minute (Timed) powerpoint presentation and talk to be followed by a short Q and A. A summary of the ppt slides should be handed to the lecturer at the end of the talk. Students are strongly advised NOT to use cue cards/scripts for this presentation.

Assessment #3: Final exam (50%)

A two hour exam will be held during the university exam period.

Students will be required to answer three short essay questions from a choice of five and a number of short answer questions (TBA). As a guide, essay responses are expected to be a minimum of 2 pages in length. Note:

- Essay questions may come from the whole of the unit but there will be more weighting for topics covered after week 4.
- A selection of sample questions will be given to students in Week 11.

You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations.
