You should read this unit outline carefully at the start of semester. It contains important information about the unit. If anything in it is unclear, please consult one of the teaching staff in the unit.

**ABOUT THIS UNIT**

- This unit introduces the principles and concepts of financial accounting. It provides a solid foundation in accounting skills and theoretical issues that will be developed in later accounting units.

- The Macquarie University Accounting and Finance Prize for ACCG100, worth $100, will be awarded to the student with the best performance in this unit.

**UNIT WEB PAGE**

- The web page for this unit is found at: http://online.mq.edu.au. It contains all information provided in this unit outline, as well as copies of lecture transparencies, tutorial solutions and announcements and changes made during the semester. Please consult it regularly.

**CLASSES**

- The day lecture is Friday 11am–1pm in X5BT1, and the evening lecture is Monday 6pm-8pm in C5CT1.
- The timetable for classes can be found on the University web site at: http://www.timetables.mq.edu.au/
- All tutorial changes must be done using e-student.

A consultation timetable will be provided at the beginning of the semester.

Please direct enquiries relating to unit administration to Charlene Chen, and enquiries relating to the lecture material to the relevant lecturer.

### REQUIRED AND RECOMMENDED TEXTS AND/OR MATERIALS

- This text is available for purchase from the Co-op Bookshop. Several copies are also available in the Library, on Special Reserve.

### LEARNING OUTCOMES

- In this unit, you will learn how to analyse and classify accounting information, and how to present this information in accounting reports. By the end of the unit, you will be able to record basic business transactions, complete a work sheet, and prepare an income statement, balance sheet and statement of cash flows.

- This unit takes a decision making focus. You will learn how accounting information assists users in making important business decisions.
• Each week, you will review the material presented by examining how it is reported and/or used by a major Australian company in its annual report. Over the semester, you will also develop an understanding of some of the real world difficulties that accountants face, including measurement of business transactions, and ethical considerations.

**ASSESSMENT INFORMATION**

• The learning outcomes of this unit are assessed in two mid-semester tests and the final examination: as follows:
  
  o Tutorial Attendance and Homework 10%
  o In-tutorial MCQs 10%
  o Mid-semester test 20%
  o Final Examination 60%

In order to pass this unit, you must pass the final examination and the unit overall.

Tutorial attendance is compulsory, and attendance will be recorded weekly. The assessment component will be based on the student’s assignment submissions, and attendance record.

Due to public holidays on 21/3 (Fri) and 24/3 (Mon), scheduled tutorials on these days will be cancelled. Affected students should attend an alternative tutorial for that week. Ask the tutor to sign on the front cover of the homework and update the attendance with your own tutor the following week.

Attendance at the mid-semester test on Saturday 5th April from 2pm to 4pm is compulsory. Unavoidable non-attendance due to illness or circumstances beyond your control must be supported by appropriate documentation to be considered for a supplementary test. Other non-attendance will obtain zero for the test.

The final exam will cover all topics.

Programmable calculators and translation dictionaries are **not** permitted in the mid-semester tests or the final exam.
The University Examination period in First Half Year 2008 is from 11th June to 27th June 2006. You are expected to present yourself for examination at the time and place designated in the University Examination Timetable. The timetable will be available in Draft form approximately eight weeks before the commencement of the examinations and in Final form approximately four weeks before the commencement of the examinations.

http://www.timetables.mq.edu.au/exam

The only exception to not sitting an examination at the designated time is because of documented illness or unavoidable disruption. In these circumstances you may wish to consider applying for Special Consideration. Information about unavoidable disruption and the special consideration process is available at http://www.reg.mq.edu.au/Forms/APSCon.pdf

If a Supplementary Examination is granted as a result of the Special Consideration process the examination will be scheduled after the conclusion of the official examination period.

You are advised that it is Macquarie University policy not to set early examinations for individuals or groups of students. All students are expected to ensure that they are available until the end of the teaching semester, that is the final day of the official examination period.

Grade Reviews and Exam Script Viewing
If you honestly believe that an error has occurred that has affected your final grade (and you have evidence to support this) you may:

a) view your exam script (deadline to register on the web is 1000 16 July; viewing 17 and 18 July) and

b) if necessary lodge a Grade Review application (in person or by proxy) with the Division by 1700 on 21 July

for further information on these two processes please refer to www.efs.mq.edu.au/ss/grade_appeals.

Teaching and Learning Strategy

By attending the weekly lecture, you will have the opportunity to learn each new topic area, and to understand its relevance and importance to the profession of accounting. By reading the textbook each week, you will improve your knowledge of accounting practice, and be guided through procedures and problem-solving approaches.
By preparing answers to the tutorial questions before each class each week, you will apply the weekly topic material through problem solving and theoretical questions, and will be prepared to participate in tutorial discussions.

- Through problem solving, you will strengthen your analytical and quantitative skills.
- Through theoretical questions, you will improve your ability to express your ideas verbally and in writing.

In order to succeed in this unit, you need to keep up to date with the material each week, by:

- Keeping up to date with announcements on the unit web page.
- Reading the textbook and taking notes in lectures on your lecture notes.
- Attending all lectures and tutorials/workshops.
- Preparing answers to the tutorial/workshop questions before each class.
  - It is particularly important to come to the tutorial having made an attempt at each question, and then annotating your assignment from the tutorial discussion and solutions in class.
  - Your annotated assignment will provide a basis for revision and study, indicating what you understood and what you need to revise. A perfect set of solutions from the webpage or the classroom is of no help in distinguishing why wrong answers are wrong.
- Revising the material each week, and consulting a tutor in the week in which you have unresolved problems with the material – not leaving it to the end of the unit.

Additional resources available to assist you include:

- A voluntary Peer Assisted Learning program will be conducted in ACCG100 this semester. Further details will be provided in the first lecture. PAL enables students to join small learning groups to assist each other in learning the ACCG100 material, facilitated by a second year accounting student who was successful in ACCG100 in 2007.

- The textbook website (See site address on WebCT) provides additional resources for students to use in their independent revision of the unit, including practice tests for each chapter and word games.

### CLASSROOM ETIQUETTE

Students are expected to arrive on time, certainly before five minutes past the hour, and not to leave until the class ends. If you have a recurring problem that makes you late, or forces you to leave early, please discuss it with your lecturer/tutor. Students are expected to be quiet during lectures unless, of course, class participation is required. Mobiles should be turned off during classes; not simply set to “silent”.
UNIVERSITY POLICY ON GRADING

Academic Senate has a set of guidelines on the distribution of grades across the range from fail to high distinction. Your final result will include one of these grades plus a standardised numerical grade (SNG).

It is unlikely that your raw mark for a unit (i.e., the total of your marks for each assessment item) will be the same as the SNG which you receive. Under the Senate guidelines, results should be scaled to ensure that there is a degree of comparability across the university, so that units with the same past performances of their students should achieve similar results. The process of scaling does not change the order of marks among students. A student who receives a higher raw mark than another will also receive a higher final scaled mark.

It is important that you realise that the policy does not require that a minimum number of students are to be failed in any unit. In fact it does something like the opposite, in requiring examiners to explain their actions if more than 20% of students fail in a unit.

PLAGIARISM

The University defines plagiarism in its rules: "Plagiarism involves using the work of another person and presenting it as one's own." Plagiarism is a serious breach of the University's rules and carries significant penalties. You must read the University's practices and procedures on plagiarism. These can be found in the Handbook of Undergraduate Studies or on the web at: http://www.student.mq.edu.au/plagiarism/

The policies and procedures explain what plagiarism is, how to avoid it, the procedures that will be taken in cases of suspected plagiarism, and the penalties if you are found guilty. Penalties may include a deduction of marks, failure in the unit, and/or referral to the University Discipline Committee.

STUDENT SUPPORT SERVICES

Macquarie University provides a range of Academic Student Support Services. Details of these services can accessed at http://www.student.mq.edu.au.
